WEST LIBERTY, MORGAN COUNTY, KENTUCKY, THURSDAY, NOVEMBER 28, 1935

WHOLE NUMBER 1312

Personal

The Courier goes to Grade A homes

Noah Hughes of Pomp had business in town Friday.

Guy Leslie of Cannel City was on our streets Monday.

Most of our farmers have their tobacco ready for market.

Justin Rowland returned Sunday from a month's stay in Illinois.

W. S. Potts made a business trip to Louisville the first of the week.

Miss Helen Jean Cox spent the week end at Pomp with her cousin, Miss Frieda Cox.

Dr. H. L. Morgan of Wrigley was doing business in the county seat on Tuesday of this week.

Mr. and Mrs. Asa Blair and children visited Sunday in Ezel with Mr. and Mrs. Lauren Robison.

Mr. and Mrs. Boyd Blair and children spent Sunday in Wrigley with Mr. and Mrs. Stanley Blair.

Ray Wells, who had been confined to his bed over a week with rheumatism, is getting out a little now.

F. H. Brown has accepted a position as draftsman with the WPA in the Paintsville office, beginning Dec. 1.

Stanley Blair and family, of Wrigley, spent Saturday here with his parents, Mr. and Mrs. W. O. Blair.

N. M. Robbins, a good citizen of Yocum, was doing business at the county seat on Monday of this week.

Mrs. W. P. Elam, Miss Ethel Marie Elam, Lockwood Elam, and Mrs. Jay Burton had business in Lexington on Saturday.

Miss Lula Brown left Wednesday for her home in Magoffin county to spend Thanksgiving with her parents, Mr. and Mrs. Eddie Brown.

W. H. Sebastian and Homer Smith, of Ashland, and some of their friends of Morehead were hunting in Morgan county the first of the week.

Zephia Graham of Johnson county, a cousin of L. L. Williams, has taken charge of Mr. Williams' department store and business is picking up.

McKinley Sergeant and daughter Opal, of Blairs Mills, ate dinner Saturday with their cousins, Mr. and Mrs. W. O. Blair and Mrs. Louisa McClain.

Henry Carter of Springfield, Mo., visited his parents, Mr. and Mrs. Will Carter, Saturday, returning Sunday. Mrs. Henry Carter is out of the hospital and slowly improving.

MEN WANTED for Rawleigh Routes of 800 families in Jackson. Reliable hustler should start earning \$25 weekly and increase rapidly. Write today. Rawleigh, Dept. KYK-260-S, Freeport, Ill. (Adv.)

Mrs. R. A. Baldwin left yesterday morning for Michigan, where she will spend Thanksgiving with her son Russel and her daughter, Mrs. H. L. Gentry, and family. Billy Keeton and Jack Cochran went along to visit the friends Russel.

Mrs. Willie Elam, daughter Maxine, son Drexel, and son-in-law and daughter, Mr. and Mrs. Paul Burgett, and their little daughter, all of Richmond, visited a few days the first of the week with Mrs. Elam's sister, Mrs. Will Carter, and with her father, H. A. Wells, and other relatives.

LIBERTY ROAD

Nov. 25.—Miss Daisy Brooks of Bearwallow spent a few days the past week with her sister, Mrs. Victor Wheeler.

Mrs. Alice Gibson of Roe Branch spent last week with Mr. and Mrs. Clarence Gibson.

J. B. Combs returned Saturday from a week's visit with relatives at Dablock.

Bascom Elam visited his father, James W. Elam, of Greer, Sunday.

C. R. Hale and Brack Combs visited at Zag on Sunday.

Victor Wheeler and Walter Short have returned home after a short visit with friends at Glomawr.

NEW POSTMASTER

Lynn B. Wells has been notified that Congressman Fred M. Vinson has recommended him for appointment as postmaster at West Liberty.

The term of the present postmaster expired in February. In April a civil service examination was held to determine the qualifications of the various applicants. Eight persons took the examination. The law provides that certain preferences including extra credits in grading the civil service examination questions, be awarded ex-service men. Lynn B. Wells was the only ex-service man among the applicants and his extra credits helped to put him well in the lead, as he had the highest grade even without this preference. Congressman Vinson did the logical thing and recommended for the position the man with the highest qualifications as certified to him.

Two high school teachers—Bessie Perry Allen and B. E. Whit—Roscoe Brong were the next in line with less than one percent variation in their grades. Mrs. Allen and Mr. Whit being among the three as certified on the eligible list.

Mr. Wells is by training, and by general sympathy with the needs and requirements of the community, exceptionally well fitted for the position he is about to assume. We congratulate him on the successful outcome of his quest and rest assured that the whole county will feel the benign influence of the administration of the postal affairs as conducted by Mr. Wells at West Liberty.

BAPTIST CHURCH

Prayer meeting and song service at 7 o'clock every Thursday night. Sunday school at 10 o'clock a.m. Church services immediately after Sunday school and also at 7 p.m. every Sunday.

Lord's Supper the first Sunday night in each month.

Everybody is invited to attend these services. "Not forsaking the assembling of yourselves together."

ROSCOE BRONG, pastor

PINEAPPLE VELVET

Is Now The VOGUE

THE latest pineapple recipe which is having a wide vogue is not only delicious but can be served with several fruits or served with whipped cream and macaroon crumbs or with the crumbs alone. Its name is Pineapple Velvet, and here is how it is made:

Soften two teaspoons gelatin in two tablespoons cold water, then dissolve in one cup of boiling hot unsweetened pineapple juice. Add one-half cup sugar, and stir until dissolved. Add one tablespoon lemon juice, and cool until mixture is thick as honey. Then fold in one cup of cream, whipped, pour into individual molds wet with cold water and chill in refrigerator. Turn out onto glass dessert plates and pour over each a few tablespoonsful of chilled canned red raspberries, blackberries or sliced peaches, or fresh fruit. Makes six servings.

To Preserve Christmas Taste

Any fruit served with this recipe slightly disguises the delicate pineapple flavor, though the combination of fruit flavors is delicious. However, if a strictly pineapple flavor is desired, omit the fruit and garnish with whipped cream to which macaroon crumbs have been added. Or a spoonful of macaroon crumbs may be placed in each mold before filling with the mixture. When unmolded the crumbs will be on top and no further garnish needed.

To the General Assembly

The legislature of the state, which will meet early in January, is charged with a grave responsibility. Its responsibility is comparable to that of the congress of the United States which convened after the election of President Roosevelt. The congress met its responsibility by following the leadership of a humanitarian president.

The general assembly of Kentucky has an equally wise leader—a leader brought up from the ranks—and the first requisite for a realization of the hopes of the Kentucky citizenship which registered a 100,000 majority for the Democratic ticket is a legislative body which can hear the voice of the people of Kentucky as is will be explained to them by the governor.

LEWIS — RIEGEL

Miss Deloris Lewis and Hiram Riegel, in Ohio, were united in marriage Nov. 12, 1935.

The bride is the daughter of Mr. and Mrs. Jim Lewis, former merchants of this place, who moved to Ohio a few years ago. Deloris is a niece of Mrs. W. O. Blair of Glen avenue. The young people will remember her as a sweet, agreeable playmate, but she has developed into an accomplished young lady of fine personality.

The groom is the son of a farmer. He is a graduate of the high school near his home and has a high standing in the community. He is an industrious and promising young man.

We join the bride's many relatives and a host of friends in hearty congratulations.

Silver Driven Out

An act of congress of 1834 established the coinage ratio of 16 to 1 between silver and gold, which drove silver from the country.

GRIFFITHS — LYKINS

Miss Mary Griffiths and Cortis Lykins, both of White Oak, surprised their parents and many friends Saturday when they drove to Magoffin county and were married. The bride is the daughter of Mr. and Mrs. Smith Griffiths and the groom is the son of Mr. and Mrs. Estill Lykins.

After a few days' tour the young and happy couple will be at home at the home of the groom's parents. The writer wishes them both much happiness.

Bear Eats Ants

When the black bear of India finds an ant hill it takes but a few minutes to tear up the hard, cemented clay and lay the deep galleries bare; then putting its gutta percha muzzle to the mouths of each gallery, it draws such a blast of air through them that the industrious laboring ants are sucked into its gullet in drifts. Afterward the bear digs right down to the royal chamber, licks up the bloated queen and goes on its way.

WISE LEGISLATIVE PLAN

Governor A. B. Chandler proposes to ask the state legislature to meet, complete its organization, and recess for a few days, in the event that it becomes impossible to complete his legislative program before the general assembly convenes.

The wisdom of the proposal is obvious to all who are familiar with legislative problems. The new governor and lieutenant governor are inaugurated on December 10. The legislature convenes the first Tuesday in January. The interval between induction into office and convocation of the general assembly is too brief to permit formulation of an adequate, thoughtfully prepared legislative program. There is wisdom in the plan proposed by Governor Chandler. He contemplates asking the general assembly to meet in accord with the constitutional mandate, effect its organization, and then go home for a period, in order to permit time for a more careful preparation of a legislative plan.

It is reasonable to expect that such procedure will result in a more intelligent program. It will probably prevent days of inaction in early stages of the session, which necessitates hasty action in the closing phase. We are unable to find anything in the constitution or statutes which would prevent the following of the plan proposed. We have no doubt that the legislature will recognize the wisdom of the plan and cooperate in its fulfillment.

NEBRASKA POINTS THE WAY

In a period when debt and taxes seem to be a common possession, the policy of Nebraska, as set forth in an article by W. E. Christensen in the New York Herald Tribune entitled "Squint on the Prairies" is interesting. Mr. Christensen says in part:

Nebraska has a new \$10,000,000 capital, without a penny of debt standing against it. Nebraska has a splendid highway system—without a single outstanding bond. Nebraska's state tax, which provides the funds for supporting the state university, four normal schools, and all other state activities, has averaged less than two mills per year during the last ten years. Nebraska has no state income tax, no sales tax, no nuisance tax. The state hasn't one cent of bonded indebtedness.

The total debts of its 93 counties in July, 1934, were but \$6,247,000—of which a single county, Douglas, accounted for \$4,500,000, leaving the small sum of \$1,700,000 apportioned among the 92 remaining county governments.

Here, according to Mr. Christensen, is the four sided plan that Nebraska follows: 1. Pay as you go. Issue no state bonds and few county bonds. 2. Reject new forms of taxation. 3. Watch public spending and the spenders. 4. Remember that even in these changing times the functions of local governments are the same as they were 15 years ago and should cost no more.

OFFICIAL VOTE ANNOUNCED

The state board of elections on Monday of this week made formal announcement of the results of the election for state officials held November 5.

The majority of A. B. Chandler over Swope for governor is 95,158. Keen Johnson for lieutenant governor has the largest majority of any candidate, with 105,878 votes over his Republican opponent. The majority of Charles D. Arnett for secretary of state over Mrs. Edwin P. Morrow is 93,478. In the railroad commissioner's race, C. C. Stannil, Republican, was awarded the certificate of election by a lead over J. N. Kennard of 2,200. Kennard is contesting the election returns from several counties and insists he will win when his suits have been heard. Every Democratic candidate for a state wide office was elected, the lowest majority being 88,987.

OLD COURT ORDER

What appears to be the oldest order of record of the Morgan county court related to strays and is worded as follows:

December court, 1824.

It is ordered by the Court that the sheriff of the County let out by Public Vendue the erecting of a stray pen on the Public Square to the lowest bidder at the next Court—the said stray pen to be built of good oak boards and to enclose the eighth of an acre with good and suitable gate and good padlock, and that he take bond of the undertaker for the performance of the undertaking with sufficient and security.

Gone to Reward

MANN

Noah B. Mann, former county judge of Menifee county, was born Nov. 12, 1873, and was 62 years and 9 days old when he departed this life Nov. 23, 1935, at his home in Frenchburg.

He was united in marriage to Martha Mann in 1891. To this union were born seven children, all living: Mrs. Beeta Wilson, Mrs. Jane Hale, Mrs. Ada Brown, and Mrs. Betty Brown, all of Middletown, Ohio; W. L. Mann of Kellie, Thomas Mann of Frenchburg, and Delbert Mann of Middletown, Ohio. Five sisters and one brother also survive: Mrs. Rhoda Morehead, Mrs. Melba Peyton, and Mrs. Roselee Cox of Dan, Mrs. C. D. Arnett of Louisville, Mrs. J. K. McGuire of Butler, Mo., and G. C. Mann of Mt. Sterling. Eleven grandchildren and a host of other relatives and friends are left to mourn his loss.

Judge Mann was converted and became a member of the Christian church eleven years ago, and lived a true, devoted life till death.

Funeral services were conducted from the Frenchburg Methodist church by Rev. Harlan Murphy of West Liberty on Nov. 25 at 10 a.m., and the body was brought back to his former residence and laid to rest in the family cemetery near Dan.

Marine Corps Enlistments

Macon, Ga., Nov. 22.—Instructions have been received at the U. S. marine corps district recruiting office, located in the municipal auditorium here, to enlist several young men between 18 and 25 years of age, who are qualified to play a brass instrument such as the trumpet, trombone, or cornet, or who are qualified to play the drum. Each applicant will be required to demonstrate his ability to play one or more of the instruments prior to his final acceptance for enlistment. They will be enlisted as trumpeters or as drummers for assignment to drum or trumpet duties, and not for band duty. The regular monthly quota of applicants for general service will also be accepted at the Macon office during December. Full information and application forms will be furnished to applicants for both duties by that headquarters.

GOING CHEAP

Russellville, Ky., Nov. 26 (AP)—The assets of the closed bank of Russellville, with a face value of \$170,000, were sold to Charles H. Ryan for \$3,400. The assets included a \$75,000 judgment against Thomas S. Rhea, former vice president of the bank, member of the state highway commission, and unsuccessful Democratic candidate for the nomination for governor.

CROCKETT

Nov. 25.—Mrs. J. T. Barker and Martha McDaniel went to West Liberty last Friday.

Married, Nov. 22, John W. Oliver to Miss Bertha Fannin, Ben H. Conley officiating.

J. W. Fannin went to Flemingsburg last Saturday with a load of stock.

Raymond Benton's little son has been very sick for a few days, but is better now.

George Blanton of Relief was here last Thursday on business.

Mr. and Mrs. Steve Lewis of Moon visited Mrs. Lewis' father, C. W. Roseberry, last Saturday and Sunday.

Albert Gilliam of Isonville attended meeting here Saturday and Sunday.

Frank Day of Ohio visited his sister, Mrs. W. R. Fannin, here, last Saturday night.

Mr. and Mrs. Gus Fultz and son Bobby and Mae Whitte visited T. P. Conley last Saturday night.

Rebecca Conley and Alene Whitte visited Lewis Conley and family last Sunday.

MOUNTAIN BOY

SCHEDULE OF SERVICES
M. E. CHURCH SOUTH

First Sunday: West Liberty 11 a.m. Cannel City 6 p.m.

Second Sunday: Goodwin Chapel 11 a.m. Cannel City 2:30 p.m. West Liberty 7 p.m.

Third Sunday: West Liberty 11 a.m. Cannel City 6 p.m.

Fourth Sunday: Cannel City 11 a.m. Goodwin Chapel 2:30 p.m. West Liberty 7 p.m.

Young people's division, West Liberty, every Sunday at 8:15 p.m. A cordial invitation is extended to you to attend these services.

Sanctions Against Italy Now in Effect

SOMETHING new under the sun is now being tried out—an economic war to put a stop to a military war. Fifty-two nations are united in the imposition of sanctions against Italy, which became an outlaw nation on November 18 by decree of the League of Nations. Four league nations, all unimportant, refused to participate. They are Austria, Hungary, Albania and Paraguay. Indirect support is given the league by two non-member nations, the United States and Germany. Nearly all the world's chief ports are closed to Italian goods, and exports to Italy of arms, war materials and a long list of key products has stopped. Loans and credits for the Italian government, public bodies, corporations and individuals are forbidden.

Should this momentous action succeed, it would seem that the end of Benito Mussolini and the Fascist regime in Italy is in sight. Should it fail, the League of Nations fails, the British communications in the Mediterranean would be threatened, and the peace of the world would be menaced. Standing steadfast against the sanctions, Premier Mussolini proclaimed the day on which they were established "a day of ignominy and indignity," as had been declared by the Fascist grand council. The day was made a holiday, flags flew from all buildings and there were numerous angry demonstrations against the member nations of the league. The frontiers of Italy and its ports were closed to goods of those nations except for certain necessities. Restrictions of food, fuel and light were put in force. As for the Ethiopian war itself, Mussolini announced an important change in commanders. Gen. Emilio De Bono was recalled with warm praise for having achieved his mission "under extremely difficult circumstances" and was to be elevated to the rank of marshal. Gen. Pietro Badoglio, chief of staff, was appointed to succeed De Bono as commander in chief of the invading armies.

The Italian forces in northern Ethiopia were preparing for a new forward movement, their objective being Amba Alaji, 40 miles south of Makale. It was learned that Emperor Haile Selassie had sent to his men in that region an order not to retreat further, so there were prospects of a real battle. Ten thousand well trained and well armed warriors from the rich province of Walega arrived at Addis Ababa to fight the Italians.

Treaty With Canada Is Made Public

AMERICAN business generally is pleased with the terms of the new trade treaty with Canada, made public simultaneously in Washington and Ottawa. Farmers and the lumber men of the northwest will not like it. High tariff advocates in congress are sure to attack the pact, but its terms cannot be affected for three years. Even were congress to repeal the reciprocal trade act under which President Roosevelt acted in negotiating the agreement, it is considered a trade agreement rather than a formal treaty, and goes into effect January 1 next.

Government officials, foreseeing adverse reaction in some quarters because of some of the sliced American duties, sought to show the pact would lead to greatly increased trade and employment which would benefit the country.

President Roosevelt stressed that while duties were lowered on Canadian cattle, cream, seed potatoes and certain kind of lumber, quotas placed on these articles would prevent serious interference with the American market.

An analysis of the pact shows that the United States grants concessions to Canada on 79 major commodities, including:

Tariff slash on four-year-old whisky from \$1 to 50 cents per fifth of a gallon.
Reductions in duties on specified quotas of beef cattle (from 3 to 2 cents per pound on animals over 700 pounds); dairy cows (2½ to 1½ cents); cream (50.6 cents to 35 cents per gallon); white or Irish seed potatoes (75 to 45 cents per 100 pounds); Douglas fir and western hemlock (50 per cent).

Reduced duties on lumber and timber of other kinds; cheddar cheese, turnips, apples, hay, maple sugar, live poultry, horses, halibut and some other fish; some leathers and ferro-manganese.

A pledge to keep on the free list Canadian pulpwood, newsprint, unmanufactured wood, shingles, lath, lobsters, certain furs, crude asbestos, artificial abrasives and fertilizers.

A promise to maintain the present 10 per cent duty on feedstuffs for animals.

On the part of Canada the duties are cut on 180 commodities, some of the leading concessions being. Reduc-

tions on wheat (from 30 to 12 cents a bushel); off-season fresh vegetables (50 per cent); vegetables imported in marketing season (35 per cent); most classes of farm machinery (50 per cent); industrial machinery (35 to 25 per cent); mining and textile machinery; radios (30 to 25 per cent); electric refrigerators; tinplate manufactures; dressed lumber; building materials; motor vehicles; cotton fabrics, furs, chemicals, silk fabrics, cotton manufactures, electrical apparatus.

Also rate cuts on oranges, grapefruit, nuts, iron and steel manufactures.

Place magazines and potatoes on the free list.

A pledge to grant the United States, on 707 articles, the lowest rates paid by any non-British country.

A promise to seek legislation to permit Canadians visiting the United States to carry \$100 in American goods duty free back to their homes each month.

A pledge to liberalize the system of establishing arbitrary valuations on American products.

A promise to keep raw cotton on the free list and to put tractors on that list.

United States Will Not Interfere in Mexico

REQUESTS made by the Knights of Columbus that the United States government make an investigation of alleged religious persecution in Mexico have been denied by President Roosevelt in a rather sharply worded letter to Supreme Knight Martin H. Carmody. Mr. Roosevelt said:

"I decline to permit this government to undertake a policy of interference in the domestic concerns of foreign governments and thereby jeopardize the maintenance of peaceful conditions."

Baldwin's Government
WINS ELECTIONS
PRIME MINISTER STANLEY BALDWIN and his Conservative government have won an impressive victory in the British parliamentary elections, although the Laborites succeeded in decreasing the Conservative majority in the house by about 60 seats. Baldwin himself was unopposed for re-election, but Ramsay MacDonald, lord president of the council and former prime minister, was badly defeated, as was his son, Malcolm, who has been minister of colonies. The elder MacDonald left the Labor party to form the national government, and the Laborites had been after his scalp ever since. The government party will have a majority of about 250 in the next house of commons.

"It was a splendid result," Baldwin said in a statement. "The country has renewed its support of the national government. It has expressed decisively its confidence in our will and ability to continue our work for national restoration and world peace."

The newly elected members of parliament meet at Westminster on November 23 to take their oath of allegiance to the crown. This procedure will occupy three days after which commons will adjourn until December 3 when King George will open the new parliament.

Clash in North China Is Imminent

WITH everything prepared for the proclamation of autonomy in North China, there was almost the certainty of serious fighting in that region between the troops of the Chinese National government and the forces of autonomy movement leaders. It was reported in Tokyo that Gen. Chiang Kai-shek, virtual dictator of the National government, had mobilized 300,000 soldiers in the northern provinces, chiefly along the Lunghai railroad in Shantung. The Japanese officials would not say what action Japan might take if Chiang Kai-shek should move his forces farther northward, but they admitted there probably would be a serious battle.

Shanghai heard that several Japanese troop ships had reached Taku, 27 miles southeast of Tientsin, to block the approaches to that city. Japanese forces already were massed at Shanhaikwan, main gateway to northern China at the east end of the great wall.

Farm Mortgage Amendment Is Declared Illegal

LEGISLATION designed to replace the Frazier-Lemke farm mortgage moratorium act after that law was declared unconstitutional by the United States Supreme court, was itself declared illegal by the United States Circuit Court of Appeals in Chicago.

The judges found, in effect, that the amendment adopted in August of 1935, reducing the moratorium period from five to three years, exceeded the powers of congress as did the original measure invalidated last May.

The Day Before Thanksgiving

New England Thanksgiving Busy Time

THANKSGIVING day! How these words spelled days and days of work and worry for the colonial housewife! A festive holiday it was called by proclamation, observes a writer in the Boston Herald, but actually it represented a day which demanded more preparation than most any other in the year. Our old New England traditions required it—the Puritans did, so must we—the common understanding of the day.

In days of yore grandmother would start her Thanksgiving preparation weeks in advance. The pies must be made. Of course she wouldn't serve mince pies that hadn't "ripened." They were made in quantity and put down cellar where they frequently froze to a solidly overcome only by a hot oven just before the feast.

In passing it might be well to remind you of the custom in one New England family to have three pieces of pie for breakfast on Thanksgiving morn. Mince, apple and squash were the three dictated by tradition.

Well in advance of the traditional day one would see grandmother take down the seasoning used but a few times a year, the crackers would be ground up and gradually the stuff for the turkey was prepared—this also went down cellar to ripen. We mustn't forget the plum pudding which was made well in advance and hung in a bag up in the attic suspended from a nail so interested mice could not approach.

Then came the days before Thanksgiving. Sons were drafted to collect and crack the butternuts, walnuts, beechnuts, etc. (and more than one finger was smashed in the process). Daughters were drafted to peel squash, turnips, carrots, potatoes, sweet and white, and of course the proverbial tear-producing onions.

The turkey must be caught, killed, plucked, singed and hung up for a day before he was brought to the kitchen. Grandmother must make her famous nut bread for William ("he does like it so when he comes home"). "Sadie, you make the fudge—Alice, you make the molasses candy—Sue, you make—" and so it goes. Everyone hustles, all wanting the same dishes, the same stove cover, the mix'n' spoon, etc.

Thanksgiving Preparations Started Long in Advance.

the village and get me some more crackers—Glory me! I've run out of seasoning!"—and the errands start. These were typical New England days of preparation for the Thanksgiving feast, all of which must be executed in addition to the regular chores of making butter for market twice a week, churning the cottage cheese, collecting the eggs, etc., etc.

Then came the day—the house must be spic and span. Dozens of pictures must be dusted, the parlor must be opened up, wood brought in for the extra stove, chestnuts gathered to put on the fireplace hearth—and on went the great process of preparation.

The folks came, hugs and kisses went the rounds, the new baby was chucked under the chin and an immediate retreat to the kitchen by the feminine members took place. By one-thirty or

PLYMOUTH ROCK

BECAUSE the proprietor of a home for tourists solicited patronage on historic old Plymouth Rock in Massachusetts, he was brought before the town council of Plymouth within whose border the old rock lies. The ruling of the council was that the old rock does not belong to the town or to any private individual but to the entire country, all Americans having the same rights of ownership—in this shrine.

two the feast took place—and then the dishes. Stacks upon stacks of dishes, pots and pans (usually the turkey pan went under the sink for scouring the following day).

Games, gossip, etc., occupied a brief period until time for supper, when again the kitchen staff swung into action and made turkey sandwiches, poured the cider and cut up the pies.

As the lights were blown out it was unusual to hear the women folks say, "Didn't we have a good time, but isn't Thanksgiving a tiresome day!"

This was the Thanksgiving of yore contrasted to the modern Thanksgiving of a restful morning, a motor ride through the country or a ride "in town," a sumptuous dinner prepared by

The Wonderful Feast Is Served to the Happy Guests.

chefs who have vied with grandmother and her recipes until even she is forced to admit that she has been surprised—a delightful matinee at the theater and an evening in the game cellar at home. What a contrast—and what a pity that grandmothers of old couldn't be here now to reap the benefits of the advance of New England family traditions!

THE THANKSGIVING PIE

Thanksgiving Pumpkin Pies

From the time the first golden pumpkin makes its appearance until the last one has been taken out of storage, there's no more universally popular dessert than pumpkin pie. Although canned pumpkin is available at all times and makes excellent pies, pumpkin pie enjoys a definite season and is most appreciated during the autumn months. Everybody has his own very definite ideas of just what a pumpkin pie should be from color to taste.

SEEN and HEARD around the NATIONAL CAPITAL By Carter Field

FAMOUS WASHINGTON CORRESPONDENT

Washington.—To observe strict neutrality—but not to benefit by it—is the rather paradoxical attitude in the United States Department of Commerce. This applies not only to trade with Italy—trade with Ethiopia was never important—but to trade in other parts of the world. The thought, apparently, is not to take too much advantage of Italy's occupation with her war by sneaking away a part of her international trade!

The whole thing seems rather nebulous, though also very high-minded. But apparently it does not apply to South America. Perhaps because Washington has always regarded southern American trade as belonging to this country—not by divine right, nor even by geography, but perhaps because of some expected gratitude for the Monroe Doctrine. Though as a matter of fact that doctrine has been resented rather than appreciated by our Latin-American friends for many years now. In fact, it began to cool shortly after Washington forced France to withdraw its support from Maximilian, not long after the American Civil war.

So the best minds interested in furthering our international trade began several weeks ago to think about the possibilities in South America, now that Italy is very busy in Africa. In fact, it was decided to have a new head of the bureau of foreign and domestic commerce, and that this new head should be some one capable of taking advantage of this golden opportunity in South America.

As this is written the name of this new "sales manager" for Uncle Sam has not been announced, but it has already been discovered by our consuls from Panama down to Cape Horn that Great Britain apparently had the same idea. Whether it occurred to the best minds in Downing street before our Brain Trusters thought of it, or whether, having thought of it, the British merely went into action without waiting for a lot of conferences and on the selection of a suitable person to direct it, is not only not disclosed—it is not known. But the fact is sadly admitted, in whispers, that the British beat us to it. And the comment is sadly added—"as usual."

Not "Cricket"

It is rather interesting that the official who disclosed this situation to the writer, in discussing what he thought this country ought to do in observing the amenities, long before he mentioned the British, said that to expand our trade all over the world at the expense of the Italian international trade would not be "cricket." Which happens to be a distinctly British expression, though widely used here.

Just why it would not be "cricket" to take advantage of Italy's preoccupation in some parts of the world, and not in others, is not clear. In the Department of Commerce there is a certain theory about it. This is to the general effect that Latin-American trade belongs naturally to the United States, and that therefore anything we can do to cement it is justifiable at all times, whether the nations from which we take it are engaged in a war or not, and whether we approve of that war or not.

It may be that in London the exporters and the government figure the same way, on the theory that on account of Sir Francis Drake, or maybe Sir Henry Morgan, Latin-American trade naturally belongs to Britain, and hence any means of taking it away from some other nation is justified.

There is a widespread suspicion, however, that "cricket" does not interfere with Britain's commanding all of Italy's foreign trade that she can get her hands on. Even during the World war, some State department underlings recall, "business as usual"—which means get all you can—was quite a motto in the tight little island.

Canadian Treaty

On the whole the administration expects to benefit enormously, at the next election, by the effects of the Canadian reciprocity treaty. Its political ramifications are legion, but, now that time has been allowed for estimating its economic consequences, let's take a look at the political aspects, which were very much in mind at the White House, if not at the State department, while the problems were being weighed.

The worst liability to the administration is the dairy section, which will let a much larger volume of Canadian milk, cream, butter and cheese into this country, and hence will irritate the dairy farmers of New England, New York, Wisconsin and Minnesota, particularly, and all other dairy farmers in general.

Incidentally it was rather odd that there was such a rush to sign the treaty that the ceremonies almost synchronized with those attendant upon the delivery at the White House of the 1,250-pound Wisconsin cheese, drawn by "Dunder and Blitzen" and the rest in a Santa Claus sleigh. Which, by the way, had been intended as a high light of National Cheese week.

The dairy concessions to Canada are much worse politically than the lumber section, although actually opponents of the lumber section were more vocal. The reason is that every do-

mestic dairyman is on the same side of the dairy controversy. He wants all the protection he can get from foreign competition. Whereas the lumber industry is divided into two groups, with best opinion being to the effect that the stronger group, as far as votes are concerned, favors abolishing all restrictions against Canadian lumber and shingles.

Perhaps the best evidence is that the group favoring no tariff on lumber won every fight in congress until the very last. Then the tariff group won, but only by combining with the oil, copper and coal groups in a log rolling operation, which resulted in the imposition of the so-called "excise" import taxes, that really are tariff schedules.

Lumber Tariff

Actually the interests favoring a higher tariff against Canadian lumber are not politically important, save in the extreme Pacific Northwest. Mid-western lumber interests, which might be supposed to be allied actually are not, for the simple reason that in the days before they thought there would ever be a lumber tariff, they bought huge tracts of forest land in Canada!

Number one among the assets of the treaty, politically, is fruit. Canada's willingness to take our oranges, prunes, apricots, peaches and raisins just makes the difference between good times and bad in highly important areas in California. Incidentally, the orange schedule appeases Florida, overcoming—it is hoped—her anger against the administration for the Cuban reciprocity treaty, which let in early fruits and vegetables that compete with Floridian products.

Florida, of course, is not important politically. Not certainly when a Presidential election is being considered. But never forget California! Not because she elected Woodrow Wilson in 1916, but because her 22 electoral votes are absolutely essential to any G. O. P. hope, so far outlived, of ending the New Deal and retiring Franklin D. Roosevelt from the White House. Not even Henry P. Fletcher can count enough electoral votes to put a Republican in the White House—while AAA checks keep flowing—without California.

Figuring on Lodge

Massachusetts Democrats are figuring that Henry Cabot Lodge, grandson of the famous statesman who "broke the heart of the world" in his fight against Woodrow Wilson on the League of Nations, will be the G. O. P. candidate for senator next year. They are so sure of this that they are already shaping individual political plans to fit in with that picture.

Incidentally, they are not particularly happy about this situation. Despite his youth, they are not discounting young Lodge's ability as a vote getter. On the contrary, they point out that he has all the advantages of a great name, and none of the liabilities.

The famous Massachusetts senator, as a matter of fact, had accumulated a lot of enemies before his death. In his last race for the senate he barely pulled through. At his last national Republican convention, that at Cleveland, far from being the dominating figure he had been at such gatherings for nearly a generation, he was rather obviously sidetracked. In fact, that sidetracking led to animosities which rose to plague William M. Butler, at the time Republican national chairman and representative on the ground of President Coolidge, when Butler later ran for the senate against David I. Walsh.

None of these old feuds are believed to linger on, however, by Democrats interested in holding a senate seat, and some of them in winning that seat for themselves. They do not expect young Lodge to lose any Republican votes on account of them.

Democratic Fears

Moreover, Massachusetts has eight Republican members of the house, more than any other state at present except Michigan, New Jersey, New York and Pennsylvania. And more than such historically republican states as California, Illinois and Ohio.

So their fear is that, with evidences such as the Rhode Island election and that Massachusetts has backslidden on the New Deal, young Lodge, with nothing against him, may poll the full Republican vote.

The tremendous majority of Gov. James M. Curley in 1934 does not reassure them. They point to the fact that Curley was strong enough to nominate his own candidate for mayor of Worcester, over the sitting mayor, but then the Republicans won the office on November 5.

All of which might point to the logic that the Massachusetts Democrats would be glad to let Senator Marcus A. Coolidge have a renomination, especially as they could count on him to contribute handsomely to a campaign fund which might pull other candidates through, whether it saved him or not. But human ambitions run contrary to that notion.

Ever since it became fairly certain that Curley would seek renomination and re-election as governor, passing up the chance to come to the United States senate, there have been lightning rods put up by other Democrats.

SYNOPSIS

As Alan Garth, prospector, is preparing to leave for his mining claim in the Far North, a plane lands at the airway emergency station. In it are Burton Ramill, millionaire mining magnate, his daughter, Lilith; and Vivian Huxby, pilot and mining engineer. Believing him to be only an ignorant prospector, the men offer to make an air trip to Garth's claim, although they refer to his samples of platinum-bearing ore as nearly "worthless." Lilith Ramill, product of the last age, plainly shows contempt for Garth. Through Garth's guidance the plane soon reaches the claim site. Huxby and Ramill, after making several tests, assure Garth his claim is nearly worthless, but to "encourage" young prospectors they are willing to take a chance in investing a small amount. Sensing treachery ahead, Garth secretly removes a part from the motor of the plane. Huxby and Lilith, taunt Garth, but their tone soon changes when they try to start the plane. Returning to shore they try to force Garth to give up the missing part. Garth manages to set the monoplane adrift and the current carries it over the falls. He points out that he is their only hope in guiding them out of the wilderness. Garth begins the work of preparing for the long journey. He insists that the others help. Ramill and his daughter must be hardened for the hardships ahead in their trek to the outpost on the Mackenzie. Garth experiences difficulties in getting his companions into line.

CHAPTER IV—Continued

Though Garth had no pad, he stood up with the moose quarter on his back and lifted his end of the pole to his shoulder. But he was accustomed to packing. He bore the meat on his pack-board and his half of the two quarters on the pole with as little difficulty as Huxby toted the other end of the pole.

When they reached the camp Miss Ramill and her father were out gathering wood. At one end of the fire, thick smoke was rising from green sticks and leaves; at the other end, a pan of sliced muffed was boiling hard. After he and Huxby had lifted the moose quarters upon the rack, Garth brought water in the aluminum pot and cooled down the stew to simmering heat. Miss Ramill had much to learn about the culinary art.

After the meal Garth glanced at the red after-glow of sunset.

"Mr. Ramill, the leanto and blanket are for you and your daughter. Huxby can take the lee side of the fire. I'll keep it going. Turn in whenever you please."

A yawn surprised Lilith Ramill into a mocking laugh. She turned to her swollen-faced fiancé.

"What a howling farce, Vivian! Can you imagine me going to roost at sunset, instead of sunrise?"

Huxby forced a smile and felt at a particular sore cluster of bites on the back of his neck. Mr. Ramill cast a wistful glance towards the leanto.

"I presume, Lilith, you will prefer not to share the hut with me. Perhaps I can manage out here beside the fire like Vivian."

"No," Garth differed. "You'll sleep under that blanket until you have hardened into shape, and you'll turn in now. It's been a big day for you."

The girl bridled. "How about my wishes—and the proprieties?"

"We'll leave that to you," Garth replied. "If you consider it improper to share the blanket with your father, you're welcome to sit up and help me grain these moosehides."

Huxby stiffened. "None of your insolence! You'll treat Miss Ramill with utmost respect."

"The lady shall receive from me all the respect to which she shows herself entitled," Garth said. "Why not make it mutual, all around?"

Lilith Ramill was no less completely outmaneuvered than the engineer. She spoke to her father: "Well, I must say, Dad, if you're letting him order you around, I refuse to stay up and slave all night. Come on."

He crept after her into the brush leanto. Garth at once set to making more catgut. Huxby had gathered a thin padding of spruce tips and moss at the far side of the fire and lay down. Like the girl and her father, he soon fell asleep.

After finishing his first task, Garth tended the fire and added water to the simmering muffed stew. He next began graining the hair from the moose bull hide. He could have stretched out and gone to sleep no less readily than had the cheechacos. On the other hand, he was able to keep awake as long as he wished. He scraped steadily at the coarse moose hair, the while his ears drank in the voices of the Wild.

By the time the sun glared over the jagged crests on the northwest wall of the valley, Garth had the hair grained from both the moose hides. As he started to cut into the larger skin, Miss Ramill crawled from the leanto.

She blinked and yawned, straightened her rumpled sports skirt, and sat down to lace her boots. He gave her a friendly good morning.

"Good? Pah!" she scoffed. "I feel like the morning after. Here I am flat. Not a drop of anything for a bracer; no bath; no clothes or face cream or lotions; no make-up! Not

even a cigarette! Yet you have the face to gibe me about it!"

At that, he could not resist giving her the old quip: "Cheer up; the worst is yet to come."

She ignored it to point at the shimmering muffed in the gold pan. "Look at that filthy mess; half full of ashes. If you had a spark of decency, you'd throw it out and warm me a pan of water for my face and hands."

He finished the cutting of a mocassin piece before he replied: "In the first place, I'm too busy performing needed work to act as lady's maid. In the second place, that muffed is not filthy. You'll say it's the most delicious aspie you ever tasted. About the rest, don't you see a combined wash and bracer. If you wish a smoke, there's the fire. For cosmetics, I'll soon be making up a batch of grease and pitch mosquito dope. My final dose of frogite went on too thin to last long."

She looked her disgust. "Grease and pitch! When I have a headnet?"

"Soon as we start traveling through brush it's a question which will go first, your net or your stockings. Dope doesn't snag on branches, and you'll find it a better cosmetic than rouge and powder."

"Ugh! If I use your nasty dope at all, it will be on my legs."

"No go. You'll be scraping against rocks and running upon snags. Won't have any knees left if you try the Highland style. How about those lynx skins for leggings, along with moose mocassins?"

For the first time since they had met, the girl gave him a genuinely friendly smile. "That's decent of you, Alan. How soon can you make them?"

"Cut me a steak off that nearest leg of moose. While you're cooking it, I'll see what can be done."

When she returned the knife and started to broil the great slab of meat she had sliced off, he laid out the pair of lynx skins. A few knife strokes cut off the great hair-padded paws and slit the legs into thongs. When the girl brought him his broiled moose steak, he showed her how to wrap a skin around each leg like a high-topped legging, tying it with the crossed thongs.

"There you are, Miss Ramill. It's a pair of leggings such as our ancestors wore when they pirated the high seas in viking ships and sailed up the Thames with Hengist and Horsa."

Huxby sat up, blinking. The thin shake-down of moss and spruce tips had done little to soften the stony ground. He rubbed his stiffened back and hips. "Confound those rocks!"

The engineer looked at the partly eaten steak in Garth's hand. "How about breakfast?"

"Help yourself to all you want. Along with your own, you might broil steaks for Miss Ramill and her father. Miss Ramill is about to take a lesson in sewing. She will soon need a pair of mocassins."

The last remark checked the girl's intended refusal. While Huxby suddenly cut the three steaks and started to cook them, she carried out Garth's suggestion to grease her lynx skins with a clunk of fat.

When Garth finished his meal, he threaded a needle with smoked catgut and showed the girl how to sew the thick moosehide. Holes punched with the awl made the work fairly easy. Within a few minutes she caught the knack of handling the awl and needle. Though her stitches were irregular, they promised to hold. He cut out the leanto of the first mocassin, and another pair smaller in size.

Mr. Ramill crawled from the leanto, stiff, hungry and irritable. But sleep and the open air had whetted all appetites. As with the broiled liver, the three cheechacos—millionaire mining engineer and fastidious heiress—went at the hot meat with fingers and teeth. They were down to bedrock—to the fundamentals of living. All the elegancies of civilized eating were absent, even the supposed necessities—forks, plates, seasonings. Yet the essentials remained. They were hungry and here was food. It was neither as tender nor as savory as had been the liver. None the less, it was food.

At the end of the meal, Garth said that the first need was to fetch in the forelegs of moose. Miss Ramill rose with her father and Huxby. "Sorry," Garth told her. "Your father needs all the walking he can get. Someone must stay to mind the fire. I might mention there's a shallow rock pool a little way along the bank, beyond those alders. You'd find the water pleasantly warm for a dip."

"Really? That's not so bad."

"Yes. Only be sure to keep the fire going. It will hold off the wolves and wolverines."

Huxby took Ramill's arm and started off with him after Garth. They kept in the rear all the way to the muskew swamp.

This time, instead of lynx mates, a family of wolves were feasting on the moose meat. As sight of the men, the whole family bristled and growled but started a slow retreat.

"Shoot, Garth!" urged Mr. Ramill. "They're making off."

"Quite all right," Garth replied. "Good thing they're gorged. I might have had to waste cartridges to get rid of them. What I'd like to know is why they chose this solid meat, instead of the offal."

As if in answer to the question, a snarling growl far deeper than that of the wolves came from the border of the muskew where Garth had killed the bull moose. Up out of the thicket reared a huge gray head. Massive forelegs stroked apart the willow stems with chisel-like claws eight inches or more long.

It was a grizzly—a full-grown ursus horribilis. Garth believed the beast to be as large as those monsters of the same breed that ruled over the southern Rockies and the Sierras in the early days when Indians still were armed only with bows, and the few white hunters carried only muzzle-loading flintlocks.

The ears of the great she-bear were flattened back. Her little pig eyes glared red. The monstrous jaws gaped to let out a roar of defiance that shook the solid ground.

"Good G—d!" Mr. Ramill gasped. "A—bear!"

Huxby gripped Garth's shoulder. "Shoot, G—n you! Shoot, or give me that rifle!"

"Shut up," Garth ordered him. "That roar is only a warning. She'll not charge if we mind our own affairs. You and Mr. Ramill take hold of that nearest utorn leg and start off quietly. Don't hurry and don't run."

The cool certainty of Garth's tone compelled belief and obedience even from Huxby. Mr. Ramill was already reaching up for one of the two moose legs that had not been pulled down by the wolves. The engineer hastily

"That Roar Is Only a Warning."

turned to help him. As they started off, Garth took the other unmangled leg on his shoulder and sauntered after them.

The grizzly mother had not repeated her roar. Had they run or given any sign of hostility, she would have charged. As it was, she stood, an enormous quivering mass of curiosity, watching their quiet retreat. Her jaws had closed their ferocious yaw, and her ears were no longer flattened back.

Garth's gray eyes twinkled as he glanced back over his shoulder at the huge beast. He could not have asked for a better bugaboo to make his companions behave. Safe out of her sight, he told the two to halt and get the moose leg on a tote-pole. Huxby at once started to curse him for not shooting.

"Go try it yourself," Garth replied, and when Huxby drew away from the offered rifle, he nodded approval. "You are wise not to attack a she-grizzly with cubs."

Spurred on no doubt by the knowledge of that gray monster behind him, Mr. Ramill managed to hold up his end of the tote-pole all the way to camp. There he sank down, purple faced, wheezing that the exertion had killed him.

His daughter sat by the fire brooding. Though refreshed by her bath in the warm pool, she had begun to feel the craving for drink and tobacco. She had done little stitching on the mocassins. But she listened to horrified alertness when Huxby told about the grizzly.

Garth forestalled an outburst of hysterics. "Keep cool. The old lady will let us alone of we keep clear of her cubs. Keep up the fire, and she will shy clear of you. She doesn't fancy fire. Burnt her paws trying to rob me of a roasted porcupine."

A look at the gold pan showed Garth that the moose muffed had begun to dissolve. He cooled some of the gelatinous broth in the small pot. Mr. Ramill not only gulped down the drink. He smacked his lips and asked for more. At that, both Huxby and the girl were stirred to try the rich drink.

Garth was glad to have all three take their fill of the savory, highly nourishing dish. He knew what was

coming. He asked only that the pan be refilled to dissolve more of the muffed.

The three were accustomed to the free drinking of their kind. They had already begun to feel the lack of the usual cocktails, mealtime wines and between-meals whisky. This was aggravated by the lack of tobacco. To ease them as much as possible, he broiled lynx meat on a grating of willow stems, basting it with moose fat. The tender meat kept them occupied until the muffed broth soothed their jangled nerves.

There was a limit, however, to eating, and once its effect began to pass, their craving returned more intense than before. First Miss Ramill, then Huxby, and last of all Mr. Ramill, began to make ironical remarks aimed at Garth. He ignored them for some time. The remarks became more offensively witty and sarcastic. He dropped the mocassin upon which he had been sewing, and picked up his rifle.

"I've had enough bitters and sour berries, thank you all. Feed them to yourselves for a while. I'll go get the sleep I missed last night while acting as guardian angel of your sweet slumbers."

CHAPTER V

Mate Woman.

Far up the tundra slope, above the trough of his platinum placer, Garth found a dry moss-bedded nook on the sunny side of a boulder. He lay down, pulled his hatbrim over his eyes, and let himself fall asleep.

A full eight hours later the sun swung around its wide circle until the shadow of the rock fell upon Garth. Roused by the passing of the warm rays, he pushed back his hat and sat up. He came down to the camp. Mr. Ramill sat beside the fire between his daughter and Huxby. Two of three pouches that Garth had hidden under the moss in the leanto lay open before the men.

Miss Ramill was emptying the last contents of the sugar pouch into a pot of thick tea. She was first to see Garth's noiseless approach.

"Hail to the chief," she mocked. "My dear Mr. Garth, you are most fashionably late to dinner. Will you not join us in a cup of tea?"

Her father turned to eye the uninvited guest with a shade of uneasiness. "You see we found what you were holding out on us, Garth. It's the only trick you failed to put over."

Huxby said nothing. He tensed, ready to spring up and fight.

(TO BE CONTINUED)

Finland's National Bath

Is Worth Talking About

In some country districts of Finland, both sexes frequently share the same vapor bath, for preparing the "sauna," as it is called, is an arduous task and the steam for one is enough for several people, according to a correspondent in the Detroit News.

All afternoon the housewife is kept busy heating great stones in the bath house oven. Then when in the bath, or bathers, as the case may be—is ready, she throws water over the rocks, so causing the room to fill with clouds of hot steam.

Wishing to make the most of opportunity, Finnish bathers stay on a platform near the roof, where the hottest steam collects. Once perspiration sets in, someone rubs the bather's back with a branch of birch leaves. The aroma from these is quite pleasant and fills the bath house.

After they have steamed well, the bathers like to cool off by taking a dip in one of Finland's many lakes. If there is none nearby, they must be satisfied with a cold shower, or in winter a hurried roll in a snow bank. The Finns are so fond of their steam baths that farmers often build their bath houses before constructing their home, and all the large cities have public bath houses.

Drowning Persons

It is a common belief that drowning persons rise three times, but according to the United States public health service, it has no scientific basis. Many drowning persons do not come to the surface at all after their first submergence. When a person finds himself drowning he naturally makes a frantic struggle to save his life. In doing so he draws water into his windpipe, which causes him to cough and splutter from his lungs. He then sinks. If all the air is expelled from his lungs he will not rise to the surface at all, especially if he is fully clothed. On the other hand, a drowning person who has some control over himself may sink and rise more than three times before his strength fails completely.

Pheasants Poor Mothers

While the incubator is a satisfactory method of hatching pheasants, the hen has many advantages in caring for the little ones. As mothers, pheasants in captivity leave much to be desired. Instead of worrying with a home and family, the real mothers spend their summer roaming in a large field and "looking pretty."

Lesson for December 1

EZRA'S MISSION TO JERUSALEM

LESSON TEXT—Ezra 7:6-10; 8:21-23, 31, 32.

GOLDEN TEXT—The hand of our God is upon all them for good that seek him. Ezra 8:32.

PRIMARY TOPIC—Bringing Gifts for God's House.

JUNIOR TOPIC—Ezra's Long Journey.

INTERMEDIATE AND SENIOR TOPIC—How God Helps.

YOUNG PEOPLE AND ADULT TOPIC—Purposeful Prayer and Courageous Action.

I. Who Ezra Was (7:1-10).

1. A priest (vv. 1-5). He was from the line which was to stand between God and the people. The leader of the first company was Zerubbabel, a sort of military governor. The great need now was for a religious leader, for the people had gone far from God, as we see from the noble reformation which Ezra effected.

2. A ready scribe (v. 6). He was a teacher of the law of God.

3. His high ambition (v. 7-10).

a. He set his heart to seek the law of the Lord (v. 10). He set out definitely with the purpose to know God's Word. No one who purposes in his heart to seek the law of the Lord can fail.

b. He set his heart to obey the Lord (v. 10). He was not only concerned with knowing God's Word but obeying it. God's Word cannot be known in its fullness by the intellect; it must be experienced. An essential qualification for a teacher of the Bible, a preacher, or Sunday school worker, is obedience to God's Word.

c. He set his heart to teach in Israel God's statutes and judgments (v. 10). He not only had a love for God's Word but a desire to implant it in the hearts of others.

II. Ezra's Commission (7:11-26).

Ezra went forth backed by the decree from King Artaxerxes. The king gave him a copy of the decree which authorized him to lead a company back to Jerusalem. This decree empowered him to:

1. Collect funds (vv. 15, 16);

2. Levy tribute (vv. 21, 22);

3. Appoint magistrates and judges (v. 25);

4. Execute penalties (v. 26).

So great was the king's confidence in Ezra that he delegated all these powers to him. For this great favor, Ezra lifted his heart to God in thanksgiving (vv. 27, 28). He was mainly concerned with the fact that he was to beautify the Lord's house and acknowledged that God had put his purpose into the king's heart.

III. The Company Which Returned With Ezra (Ezra 8:1-20).

This company was comparatively small, only 1,754 males, but including the women, children and servants there were perhaps 6,000 or 7,000 people.

Before proceeding on the journey Ezra was careful to find out as to whether any of the Levites, the ministers of God, were with them (v. 15). He knew that the success of their enterprise depended upon the spiritual condition of the people. Temporal blessings and prosperity of the individual and the nation depend upon the people's attitude toward God.

IV. Ezra's Prayer and Fasting (8:21-23).

The first thing that he did was to seek God's guidance. The reason Ezra sought the Lord's help was that as far as possible he desired his mission to be free from human dependence. He did not minimize the dangers attending his journey, but since he had assured the king that the hand of the Lord would be upon all for good who sought him, he was ashamed to ask the king for a military escort to protect them from the marauding Arabs. His desire was to prove the reality of God's help, as God's honor among the heathen was at stake.

V. The Successful Journey (8:24-32).

God heard their prayer. The treasure entrusted to them was great. Perhaps the entire value of money and sacred utensils was nearly five million dollars. For a small caravan to go through a country infested by these robber bands carrying such an amount of money was most perilous, but Ezra knew that God was able and would protect them. Observe:

1. The care and honesty (vv. 24-30). The money was weighed unto them at the start and was to be weighed when turned over to the authorities at Jerusalem. The incentive to honest and strict accounting of the trust was that they were holy men and were entrusted with that which belonged to God.

2. Their safe arrival (vv. 31, 32). Some four and one-half months were required to make the journey. God brought them safely to their destination, thus proving that he is faithful to those who put their trust in him.

Perfect Love

Perfect love is distinguished by the character of its enjoyments. It craves the spiritual, the holy and Divine. Its enjoyments are purely religious; they are sought by prayer, reading the Scriptures, pious meditations and acts of Christian duty and usefulness. The enjoyments of a pure heart are sweet, rational and unswerving.

Objections

Nothing will ever be attempted if all possible objections must first be overcome.—Jobson

All Around the House

A little olive oil rubbed over paper that has stuck to a polished surface softens paper and makes it easier to remove.

Rings of canned pineapple browned and sprinkled with chopped green peppers and pimientos make an attractive garnish for steak, chops or roasts.

When pressing neckties, cut a piece of cardboard the shape of the tie and slip inside of it. Cover tie with a cloth and press with hot iron. There will then be no marks left by seams and hems.

House palms should not be exposed to the direct rays of the sun nor should they be placed near a radiator.

NO UPSETS

The proper treatment for a bilious child

A cleansing dose today; a smaller quantity tomorrow; less each time, until bowels need no help at all.

ANY mother knows the reason when her child stops playing, eats little, is hard to manage, Constipation. But what a pity so few know the sensible way to set things right!

The ordinary laxatives, of even ordinary strength, must be carefully regulated as to dosage.

A liquid laxative is the answer, mothers. The answer to all your worries over constipation. A liquid can be measured. The dose can be exactly suited to any age or need. Just reduce the dose each time, until the bowels are moving of their own accord and need no help.

This treatment will succeed with any child and with any adult.

The doctors use liquid laxatives. Hospitals use the liquid form. If it is best for their use, it is best for home use. The liquid laxative most families use is Dr. Caldwell's Syrup Pepsin. Any druggist has it.

Patriotism Inside

All movements that "require" exhibitions of patriotism fail. Patriotism is spontaneous.

A Three Days' Cough Is Your Danger Signal

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (Adv.)

Language of League

English and French are the official languages of the League of Nations.

LITTLE JACK HORNER
SAT IN A CORNER
AFTER EATING A LARGE PIECE OF PIE
HE STUCK IN HIS THUMB,
AND PULLED OUT A TUM,
WHICH HE ALWAYS KEEPS IN HIS VEST
POCKET FOR JUST SUCH EMERGENCIES

WHY MILLIONS CARRY TUMS!

MILLIONS now know the smart thing is to carry a roll of Tums always. Heartburn, gas, and other symptoms of acid indigestion have a habit of occurring at unexpected times. You don't have to dread your stomach with hard alkalies which physicians have long warned may make the tendency toward acid indigestion worse. Tums, a real scientific aid, contains no soda or other alkalies. Instead a wonderful antacid that simply neutralizes stomach acidity, the balance passing out of the body inert. Pleasant to eat as candy. Only 10c a roll. Put a roll in your pocket now.

FARMERS' COLUMN

THE FARM AND HOME

In making apple butter, add grated lemon rind at the rate of a teaspoonful to a pound of the apples after they have been cooked until soft in just enough water to keep them from burning. The recipe also calls for half as much sugar as apples.

Economists predict better prices for poultry during the rest of the winter, well into the next year. The larger supply of eggs is expected to hold prices off extreme heights. The poultry industry, as a whole, is considered to be in a good position.

Due to the fact that feeding is on the increase, cattle prices are expected to drop during the late winter and spring. Prices of the lower grades of cattle, on the other hand, are expected to rise, due to reduced supply of this type and continued shortage of pork.

It is now believed that the flavor of lamb is not affected by the fall, which is the thin papery outer covering of the carcass. Leg of lamb keeps in shape better if cooked with the fall but the appearance of the shoulder, saddle, and chops is improved by its removal.

Tests made at the western Kentucky experiment station showed that for each 100 pounds of fire cured tobacco hung on sticks, 75 pounds remained when wilted, 53 pounds when yellowed, 25 pounds when colored, and 18 pounds when the leaf and stems were dry, but the stalk still green.

Cleaning up and burning fence rows and destroying and removing debris and grass from around fruit trees will kill many injurious insects. If codling moth damage has been severe, scrap and burn the rough bark from the trunks and limbs.

To have 300 acres planted to straw berries early in the spring is the goal of farmers and business men in Muhlenburg county. Eleven meetings concerning the project had an attendance of 406. Culture, disease prevention, and marketing were discussed.

Allotment Cards and Excess Tobacco
The following suggestions regarding the use of allotment cards and the handling of excess tobacco were issued by the tobacco section of the AAA thru the state tobacco office at the agricultural experiment station at Lexington:

"USE OF ALLOTMENT CARDS."
As a contract tobacco grower, your attention is called to the following points in connection with the allotment card:

(1) All sales of tobacco produced under your contract must be entered on your allotment card, which must be presented to the agent of the secretary of agriculture at the time the sale is made in order that a tax payment warrant may be issued, before you obtain payment for your tobacco.

(2) If tenants or share croppers produced any of the tobacco under your contract in 1935, you are obligated to apply the tax payment warrants without discrimination among producers, tenants, and share croppers, in proportion to the amount of tobacco produced by each.

(3) After each sale you should check the entries on the allotment card against your sale bill to see that the number of pounds are added correctly on the sale bill, entered correctly on the allotment card, and correctly subtracted from the "unsold allotment."

(4) When all of your sales have been completed, your allotment card must be returned to the county office before the remaining payment may be made on your contract. In case your allotment card is lost, the secretary of

UNIVERSITY OF KENTUCKY

Chapter XXXII

The production of natural gas has had an interesting history. Found in association with petroleum, it was largely a side issue and large quantities of this natural resource have gone to waste. Its loss has also been a loss of petroleum, for it is the explosive force, pushing petroleum out of the rock into the drilled well. This waste-fulness was largely a matter of lack of a market for it, but in the industrial east there has been a rapid growth of this market. In many parts of the west the coming in of a prospective oil well as a gasser is nothing to brag about. There is no market for it. As an industry there has been a rapid development since 1921 with production in Kentucky increasing from about 5,000,000,000 feet in that year to 29,000,000,000 feet in 1933. Gas is piped not only to our own cities but elsewhere as far as the Atlantic seaboard.

Eastern Kentucky has almost a monopoly on this resource. The reason for this was explained in an earlier article. As the Appalachian mountain region, where there has been greater compression and rock deformation, is approached, the lighter oils are found, and then gas. The gas occurs under-

ground in much the same manner as petroleum and is prospected for and drilled in the same fashion.

Almost three fourths of the present production comes from the black shale of Floyd county and vicinity. It is the same shale outcropping so conspicuously in the Knobs region. This production came as a surprise for the Ohio black shale had up to this time been productive of neither oil nor gas, except in Meade county. This field discovered in the eighties of the last century supplied Louisville until recently. The Cornifrons, the greatest oil producer of Kentucky, comes second as a gas producer with perhaps ten percent from a number of different fields. Lexington formerly depended on gas from this source in Menifee county. Other sandstones and limestones contribute the balance.

Western Kentucky is not much of a gas producer and contributes perhaps a quarter of a billion feet. The Campbellville gas pool, without a market, formerly sold its gas for the manufacture of carbon black. In common terms, this is black soot obtained by directing a gas flame against a cold surface. This is, however, a wasteful process and gas is no longer used in Kentucky for that purpose.

POULTRY

COMFORT OF HENS
MEANS MORE EGGS

Clean Range, Water Needed for All Flocks.

By C. J. Maplin, Extension Poultryman, North Carolina State College.—WNU Service.

The productivity of laying hens in fall and winter depends a great deal upon the care and management given the poultry flock during the latter part of the summer.

Good egg prices are expected for the rest of the year and it will pay the flock owners to bring their hens into lay under favorable conditions.

Birds should be given good feeding, a clean range, plenty of clean fresh water, and a clean comfortable house or shelter.

By keeping the birds healthy and getting them to put on as much fat and body weight as they can, they can be brought into lay with a reserve of flesh and energy to meet the demands of the laying season.

Sexual maturity should be delayed in order to give the birds a chance to put on weight before starting to lay. Do not give early hatched pullets a feed high in protein. Avoid moldy or chaffy feeds, or such material as corn ground with the cobs.

If the birds fail to grow well, examine them for internal and external parasites. If mites or lice are found, clean the roosting quarters and treat the birds at once. For round worms or tapeworms, give the pullets a reliable worm treatment.

Find a good feed and stick to it unless there is a good reason for changing. Poultrymen often lose money by switching from one brand to another.

Remove the old birds from the winter quarters. Scrub the floor and the fixtures and expose everything possible to the sun; then let the house stand vacant until well dried. Use disinfectants liberally.

Must Supply Laying Feed to Encourage Egg Yield

To have laying hens, it is necessary for them to get the nutrients contained in eggs and they must have these foods in sufficient quantities to make the eggs. Feeding limited amounts of laying mash will not give maximum egg production. The profitable method of feeding mash is the open mash hopper that contains mash all day. Although this may seem extravagant, notes an authority in the Montreal Herald, it has been repeatedly demonstrated that hens will eat no more mash than they use for egg production.

When hens which have not had laying mash or have had mash only in limited quantities are first put on the open hopper, they will eat a large amount during the first few days. However, they will soon settle down to the average of about seven and one-half pounds of feed each per month.

Although the laying mash is an important factor, it loses its value if water is not available all the time. The water should be within five feet of the mash hopper.

Grain should best be fed to the hens about two hours before they go to roost; it should not be thrown on the ground but should be in troughs. This differs from recommendations often made in the past, but experience proves that trough feeding is a sound practice.

Ventilated Crib Helps Save Corn

Late Maturing Crop May Be Salvaged if Properly Dried, Cured.

By W. A. Foster, Rural Architect, College of Agriculture, University of Illinois.—WNU Service.

Since much of the corn crop was late in maturing, cribs which not only protect the grain but give it plenty of ventilation for drying and curing will save what might otherwise be heavy losses.

Facilities for adequate ventilation can be built into new cribs or added to those which will be undergoing repairs this fall. In addition to plenty of air circulation, the crib should protect the grain against bad weather and keep rats, mice and other destructive rodents away from the corn.

In figuring the amount of space needed, the farmer can base his estimates on the fact that ear corn requires two and a half cubic feet to the bushel, while shelled corn or small grain requires just half that much. This means that a crib 10 feet wide and 10 feet high will hold 40 bushels of ear corn to each foot of length. The most convenient length is 30 to 40 feet.

Since it is better to have all of the crib room at one location rather than scattered about the farmstead, the "growing plan" is ideal, especially for the young farmer who is just starting to build up his place. One crib may be built on the selected site this fall. Later on another unit may be added facing the first and with a driveway between. As small grain bins are needed they may be built above the cribs and the roof finally completed.

Either wood or concrete floors are satisfactory for corn cribs if properly constructed. However, extra care should be taken to "build out" the rats. This can be done by placing a strip of half-inch mesh hardware cloth around the edge of the crib between the building and the outside wall. This strip should reach from the floor to about 2 feet up on the walls and be topped with a strip of galvanized iron bent outward to prevent the rats from getting through the wall above the strip of hardware cloth.

Hogging Down Corn Found to Be Satisfactory Plan

Practical feeders and experiment stations have shown that hogs properly managed will gain as rapidly and as economically when allowed to harvest the corn crop as when the crop is harvested and fed in the usual manner, says the Indiana Farmer's Guide.

For hogging down corn most feeders prefer well grown but thin shoots weighing from 125 to 150 pounds—shoots that have been grown through the summer on forage and have not been previously fed a heavy grain ration. Such hogs will eat a large amount of feed and will gain rapidly. Heavier hogs such as brood sows and fattening hogs almost finished are likely to break down too much corn and not clean it up so well as they go along, thereby increasing the waste.

Some farmers turn in a few sows until sheens learn how to break down the corn, but take the sows out before they become too fat. It is also a common practice to move the fattening hogs to a new area before the corn is entirely cleaned up, and follow them with sows and smaller pigs. Such management insures minimum waste.

Renting Equipped Farms

The usual terms on which fully equipped farms are rented are a 50-50 division of income and expense. This type of lease is known as the 50-50 live stock share lease. The landlord furnishes the farm and one-half of the productive live stock. He pays the taxes, insurance, and upkeep of the buildings. The tenant furnishes the work stock and machinery and the other one-half of the productive live stock. The operating expense and the operating income are shared equally. Slight modifications of this plan may be made to cover special conditions on individual farms.—George A. Pond, Division of Agricultural Economics, University of Minnesota.

Australia Taxes Wheat

In an effort to solve the surplus wheat problem in Australia, the commonwealth has adopted a law permitting the levying of a processing tax of not more than 7.5 cents per bushel, to be paid farmers for withholding their grain from the market. This is not an acreage control plan, but a marketing plan. Farmers who suffer any loss from holding the wheat may be compensated up to the limit of the tax. Conditions to the payment require that the beneficiary of the tax be the actual producer of the wheat, that the grain be in good condition when stored, that it be at least six months in storage and that it total at least 4,000 bushels.

Agricultural Notes

For each pound of ragweed grown in the corn field deduct three pounds of corn.

Farmers save freight by buying highly concentrated fertilizer and applying with machines adapted for the purpose.

Collective farmers of Minsk province, U. S. S. R., have drained more than 225,000 acres of swamp to make farm land.

WORDS OF WISDOM

A running account makes many figures.

He who laughs last didn't see the point.

A man who is chic knows it and that spoils everything.

Usually, the winner can't make much of a speech.

The smaller your flat, the sooner you find objects you've lost.

Few men are impressed, any more, by being called "big boy."

Love makes the world go round and sometimes keeps it square.

"Might does not always make right, but it usually makes good."

The ships most successfully navigated by women are courtships.

Great minds run in the same channel, but a channel is not a rut.

One can have so few contacts with the world as to be quite happy.

In its way "wisecrack" is a more pertinent word than "epigram."

"Be yourself." Indeed; one of the greatest of human achievements.

A beautiful woman is seldom plain spoken. Gracious words enhance beauty.

Is a taste for reading usually a youthful one, too, like most of the others?

Proof of a great man is that his fame far outlives the bad stories about him.

Anyone set to telling people what to do in politics fizzes clear out time after time.

There are some so contrary—or self-respectful—that they will not join others in riding a free horse.

To have to fight, day and night, to carry on one's business does not necessarily make one broad minded.

Missing Link Found at Cape of Good Hope Point

The remains of a prehistoric animal believed to be the "missing link" between the reptile and mammal kingdoms have been discovered at Karroo, Cape of Good Hope, notes a correspondent in the Philadelphia Record.

They have been pieced together by Dr. R. Broom, the South African paleontologist, at the Transvaal museum there.

In recognition of its importance, he has christened the animal Eumantella Murex, in honor of Gideon A. Mantel, one of the pioneers of paleontology.

Although South Africa is rich in reptile remains, nothing like this new discovery has ever before been found. It has a beak and a peculiarly shaped palate. Fourteen teeth spring from the front of its jaw bone.

When alive it was sluggish in disposition, says Dr. Broom. It lived in marshes and fed in the same manner as a tortoise.

Catfish Feast on Jackrabbits

Down in Tishomingo, Okla., they have catfish that eat jackrabbits, says Science Service. This is not a result of the floods in the state's rivers, however, because the catfish are of the valuable channel-cat species and live at the fisheries station. Once a week the fish get rations of beef liver, and once or twice a week they are fed in royal style on jackrabbit meat. Since Oklahomans like channel catfish, and don't care especially for jackrabbit, the arrangement is satisfactory all around—except to the jackrabbits.

Deadly Rays

Invisible short-wave light-rays are now being manufactured at the Smithsonian Institution that need only to shine on simple organisms to destroy them. These light-waves are the shortest rays of sunlight. They are so short, in fact, that they rarely reach the earth, being blocked off by our atmosphere. Consequently, one-celled organisms, such as bacteria, and certain parasites have never developed resistance to the rays and die instantly when exposed to them.

Fruit Growers Rent Bees

Transportation of bees to orchards for the pollination of the fruit trees has become a regular business with many beekeepers. Usually one colony or hive of bees is required for each acre of orchard. The beekeeper receives two to three dollars for each colony planted in an orchard. Bees are rented for the pollination season by operators of large commercial orchards who do not maintain their own apiaries.

Copper Is Recovered

The copper on the bottom of the wooden warship sunk off Riga, Latvia, in 1790 during a battle between Swedish and Russian fleets and raised recently, will more than repay the cost of salvage.

Tablet Honors War Dead
In memory of the London Scots who fell in Palestine during the World War a tablet was placed recently in the Scottish Memorial church at Jerusalem.

Guard Your Musings
"What are you thinking about, John?"
"Same as you, Mary."
"If you do, I'll scream!"

IN THE LIMELIGHT

A visitor to the village was greatly interested in all that he saw. In particular he noticed that one inhabitant of the place was treated with marked respect by the others.

"I observe," remarked the visitor, "that you all treat that man with marked deference."

"Yes," was the answer, "he's one of the early settlers!"

"Early settlers?" asked the other.

"Why, he can't be over thirty years of age!"

"That may be true," replied the old man, "but he pays all his bills promptly on the first of every month!"—Pearson's Weekly.

FLOOR, PLEASE

"My friend, can't I interest you in the uplift?"

"Not a particle. I'm an elevator man taking a day off."

Answered

Mrs. Jones was spending a day in bed with a severe cough, and her husband was working in the back yard and hammering nails into some boards. Presently his neighbor came over.

"How's the wife?" she asked.

"Not very well," said Jones.

"Is that her cough?"

"No," replied Jones, "it's a hen-house."

Way to Tell

Don had for his playmates twin boys, Ralph and Raymond, who looked very much alike.

One day his mother asked:

"How do you ever tell these boys apart?"

"Well," Don explained, "when we play together, I just call, 'Raymond, come here' and when he comes I know he's not Ralph."—Indianapolis News.

Comparing Statistics

"I am surprised," said the statistician, "to look back and see how many pork, chops and vegetables a dollar used to put into a market basket."

"And I am now surprised," said the housewife, "to see how many dollars a few groceries will put into the cash register."

Preservation

"Of course, you are in sympathy with every honest desire to save your country."

"I am," said Senator Sorghum. "But care is required as to method. Some of us patriots get an idea that we are preserving our country by getting it into a pickle."

Her Flower

Acrobat—When the lady lion tamer got married, did she wear a lily of the valley bouquet?

Contortionist—No, she carried a bunch of dandelions.

KEEPING AWAY

"Are you looking for work?"

"You bet yer life I'm lookin' fer work! I've got so I kin smell a job a mile off."

Panting Haste

Judge (sternly)—Well, what is your alibi for speeding 50 miles an hour?

George—I had just heard, your honor, that the ladies of my wife's church were giving a rummage sale, and I was hurrying home to save my other pair of pants.

"Case dismissed."

Spelling

Father—Sonny, why don't you get the habit of going to the dictionary when you want to know how to spell a word?

Sonny—I do sometimes, but somehow the dictionary always has it wrong.—Pathfinder Magazine.

Love on Condition

She (gushingly)—Will you love me when I am old?

He—Love you? I shall idolize you. I shall worship the ground under your little feet. I shall—um—er—You are not going to look like your mother, are you?—Pathfinder Magazine.

Good Politician

Little Richard—Mother, may I have a nickel for the old man who is crying outside?

Mother—Yes, dear, but what is the old man crying about?

Richard—He's crying, "Peanuts, 5 cents a bag"—Labor.

That's One Way of Putting It

Vicar—I was grieved to hear your husband has gone at last.

Mrs. Black—Yes, 'e 'as, sir, and I only 'ope 'es gone where I know 'e ain't.

MORGAN COUNTY SCHOOL PAGE

(Under Auspices of Ova O. Haney, County Supt.)

WEST LIBERTY SCHOOL NOTES

The following students made all A's in their six weeks tests, including department: Dolores Elam, Frank Sowards, Elizabeth Burton, and Jesse Cottle.

The following students had only one B and the other grades A: Martha Carolyn Blair, Betty Arnett, and Helen Stacy.

In the B grades the following students were on the honor roll: James Arnett, Anna Price, Paul May, Willis Turner, Tommy Williams, Virginia Cox, Myrl Nickell, Helen Davis, Herbert Rose, and Anna Gross.

Mrs. Baldwin is giving one period each day to teaching singing in the grades. Two rooms combine at free activity period and Mrs. Baldwin is pleased with the progress being made. On Fridays she teaches Mr. May's room at the church.

Grade cards are being given out today and the pupils are asked to take them home and have their parent examine them. These cards are a visit from the teacher to the parent about your child. They indicate progress and the direction in which your child is going. Please examine them carefully. If they are not satisfactory talk to the teacher about them. There is always a cause for poor grades. You will find that the teachers are fair and that the grades are about true. It may be your child is out on the street when it should be in the home. It may be in poor health. It may be the company it keeps. It may be for lack of books. Find out the cause and correct it.

Thanksgiving holidays will be Thursday and Friday and there will be no school these days.

The school is grateful to Supt. Haney for the new books he sent to the library. They are very interesting books and were badly needed.

No student in the junior class has made F this year.

Mr. Vaughan and Mr. Carpenter were in Ezel on Saturday.

Honor roll, Mrs. Burton's room: Delena Bradley, Billy Black, Charles Black, Paul E. Reed, Goldie Tyler, Imogene Nickell, Emory Tyree, Hollie Williams, Charles Black, Parker May, and Ruth Craft have not been absent or tardy this month.

Mrs. Bill Blevins, Mrs. Enoch McKenzie, and Kenneth Carpenter visited Mrs. Burton's room on Friday and Monday.

A Thanksgiving program is being given in Mrs. Turner's room.

The seventh grade pupils have a contest on between the girls and boys to see which can have the most attending Sunday schools. The losing side will give the winner a Christmas party. We are all anxious to know which side will win.

Mr. Whit has made the seventh grade a new bulletin board and book case. He also put a new door knob on our knobless door. The pupils wish to thank Mr. Whit for his kindness.

Mrs. Wormsley's room has again won the best Sunday school record for the grades. Mrs. Turner won second place. I believe it is high time for the other grades to get busy and beat these two rooms, altho they are hard to beat.

Mrs. Allen's room in high school has again won first place in Sunday school attendance. Miss Keeton's room won second place again. Let's get busy and beat these winners!

SCHOOL BOARD IN RIME
I am telling you in my rime something about the school board at this time.

There is Uncle Grant, you see, After our next meeting on the board he'll not be.

Also Uncle Pete, who for four years traveled a rough route, And at our next meeting he'll walk out.

Then in come Bradley and Caskey For four years to fill their place And the school problems to face. Mr. Nickell did resign, And the board elected Goebel to fill his place at this time.

So Benton and May are left of the five Who started with Haney in the new drive.

Mr. Pelfrey, who sits at his desk in a quiet way, And at our meeting has little to say, But he is wise, not a fool, For his duty is to see why children are not at school.

But Ova sits with pencil in hand, Looking like a handsome young man. And saying, "Men, I tell you, We must get this building program thru."

We will walk out of the old year into the new, Then, teachers, we'll again talk to you. I cannot say, but I guess You want us all to vote yes.

J. F. BENTON

MERRY CHRISTMAS!

I heard the bells on Christmas day Their old, familiar carols play, And wild and sweet the words repeat Of peace on earth, good will to men! Dear Teacher:

You are requested to be present at our "Teachers' Christmas Reception," Saturday night, Dec. 7, at the West Liberty school auditorium. Our program is dedicated to the teachers and county board members of Morgan county. The program follows:

7:00 Why We Are Here

7:10 Address —Ova O. Haney

7:30 Special Music

—Mrs. R. A. Baldwin

7:45 Address —Dr. J. D. Falls

8:00 Special Music —Hill Billy Band

8:20 Social Hour —Mrs. Blaine Nickell, Mrs. Nancy Turner, Miss Floris Cox, and Yandal Wreather.

Refreshments!

Merry Christmas to you all. SUPERINTENDENT ATTENDANCE OFFICER HELPING TEACHERS

STACY FORK SCHOOL NEWS

Our school is progressing nicely with our teachers, Mrs. Catherine H. Byrd and Walter Franklin, to lead us. Many improvements have been made in our school this year. We have bought new window shades, new screen wire for the windows. We have painted our schoolhouse. We also oiled our floors and got fifteen new seats. We have repaired our steps, covered the coal house, and made a new well box.

We in the eighth grade have formed a reading book club. We have read 68 books. We are interested in making our club worth while.

We thank Miss Floris Cox, Edith Ward, and Zola Haney for the books they brought us. We appreciate those books and think they are worth while.

We welcome Eugene Little back to our school. He had been attending school at Morehead.

We welcome Mr. Oscar Pelfrey and Mr. O. O. Haney, our county superintendent, to visit our school.

THE EIGHTH GRADE

MINUTES OF ATTENDANCE

OFFICERS' MEETING

The attendance officers' department of E.K.E.A. held its second annual meeting at the Henry Clay hotel at Ashland on Friday afternoon, Nov. 8. In the absence of the chairman, Grace Collinsworth, Miss Lulu Meredith of Ashland presided. The following program was given:

Scope of attendance officers' duties

—George Braubham

Methods for securing good attendance

—Grayson Self

Case problems

—Thelma Kaut

Socializing influence of attendance officers

—Lulu Meredith

Selling the school to the home

—W. O. Pelfrey

An equal opportunity for every child

—John Warix

Psychology of the child who is forced to attend school

—Tong West

Round table discussion, led by state census and attendance director, Moss Walton.

The following officers were elected for the coming year: chairman, W. O. Pelfrey; secretary, Thelma Kaut.

Moss Walton, state director, and John Warix, Floyd county, reported the following recommendations from the department of attendance officers to Eastern Kentucky Education association. Resolutions adopted:

1. It has been the experience of the attendance officers in Kentucky that there is a greater need for an adequate health program.

2. The attendance officers in Kentucky have found that their efforts in enforcing the compulsory attendance law are handicapped because of the lack of attention being given to providing facilities for caring for maladjusted children who are of compulsory school age.

(Signed) John Warix, Moss Walton, Otis C. Amis, director community and vocational activities of the national youth administration in Kentucky, explained the work of the national youth administration and answered questions concerning it.

Chairman Pelfrey appointed the following program committee: John Warix (chairman), Tong West, and Thelma Kaut.

There being no further business, the meeting was adjourned by the chairman.

Earliest Specimen of Tapestry

The earliest specimen of tapestry work which can be accurately dated was found in 1903 in the tomb of Thutmose IV (1420-1311 B. C.) at Thebes.

PARENTS-TEACHERS MEET

The regular meeting of the Cannel City P.T.A. was held Nov. 4. Mrs. G. W. Leslie, president, presided at the meeting, which was opened by singing "America." The devotional was given by Mrs. J. D. Whiteaker. In the short business session that followed, the membership chairman reported 51 members and the finance chairman reported \$12.60 proceeds from the spelling bee. It was voted to donate \$5 to the debating club for material.

The meeting was turned over to the program committee, Helen Walter, Velma Lacy, Harold Stacy, and Waldo Risner sang "Stars of the Summer Night" and "Carry Your Cross with a Smile." Mrs. D. C. Burton, as chairman of the program committee, introduced Ezra Bach, who in turn introduced Dr. J. S. Maxwell, the guest speaker of the evening. Dr. Maxwell discussed in an interesting and vivid way the present conditions in Ethiopia. Other guests for the evening were Mr. and Mrs. Stanley Dennis of Ezel and the members of the junior and senior classes.

The picture for attendance for the month was awarded to Mr. Burton, home room teacher of the junior and senior classes. Miss Spencer's room, the second grade, was awarded the picture for the grades.

Following the program, a reception honoring Dr. Maxwell was held in the parlors of the church. In the receiving line with Dr. Maxwell were Mrs. G. W. Leslie, president; Mrs. D. C. Burton, vice president; and D. C. Burton, chairman of the finance committee.

Mrs. J. D. Whiteaker, chairman of the social committee, presided at the tea table, which was covered with a lace cloth and had as its centerpiece a bowl of white chrysanthemums. White candles in silver holders completed the appointments. Assisting in entertaining were Mrs. J. W. Benton, Mrs. M. R. Ealm, Mrs. Thos. Davis, and Miss Elizabeth Leslie.

There were approximately 75 persons present.

CASKEY FORK SCHOOL NEWS

This Thanksgiving season finds us with a number of things to be thankful for. We are enjoying a new front porch, clean oiled floors, a warm house with new window panes. We are so happy with our new library, consisting of 31 new volumes, that we sometimes forget to get our other lessons. We won a prize at the fair with which we are buying a sanitary drinking fountain. Somebody was kind enough to build us two new sanitary outbuildings. We wish to thank everyone who had part in providing these things for us and we are going to show our appreciation by taking care of them.

Our teacher, Miss Gladys Cecil, of Mize, spent the week end with Mr. and Mrs. Paris Stamper of Rexville.

We wish all schools a happy Thanksgiving. MILDRED RISNER, Reporter GLADYS CECIL, Teacher

WILLIAMS CREEK SCHOOL NEWS

Our attendance has dropped since this cold rainy weather, but we are still working.

The sixth grade pupils are completing their unit this week on "The Pilgrims." They are making a Pilgrim village and are writing a book about the Pilgrims.

The eighth grade pupils are making a book on geography. The lower grades have made books of birds and flowers and all seem to enjoy their work.

We have on our news stand "The Instructor," "News Week," "The Pathfinder," "The Country Home," and "The Farm Journal." We enjoy these magazines and wish to thank our teacher, Mrs. Hannah Maxey, for her kind efforts and willingness to help us in all our undertakings.

Two Meanings to Word

Alcohol, Writer Says

The word alcohol has two meanings. It may refer to the volatile, ethereal liquid that is the essential constituent of certain beverages. From the organic chemist's viewpoint, says Thomas M. Beck in the Chicago Tribune, it refers to a whole class of compounds which consist of a string of carbon atoms, attached to which are a number of hydrogen atoms, and in addition an OH (oxygen and hydrogen) group.

The simplest of these alcohols is that containing one carbon atom, known as methyl or wood alcohol. That containing two carbon atoms is ethyl or drinking alcohol. A commonly known one, still higher in the series, is amyl alcohol, or fusel oil, which is used as a solvent. The lower of the alcohols are volatile, pungent liquids that are soluble in water. Higher ones are oils, and still higher ones are waxy solids.

Until recently these last have been laboratory curiosities. On the other hand, fatty acids, consisting of similar long chains of carbon atoms, but with a COOH group instead of an OH at the end, are quite common as the chief components of all animal or vegetable fats. During the last few years there has been developed in Germany a commercial method of changing the COOH into a CH₂OH group, thereby converting the fatty acid into a solid alcohol.

These alcohols by themselves may be used for many of the purposes that other waxes are. Although they are insoluble, they possess a greater affinity for water, because of their alcoholic nature, than do most other waxes. For this reason they are readily emulsified with water.

Tuberculosis Fatal in Birds

There is no treatment to cure tuberculous birds known to veterinary science up to the present time. Destruction of the flock is the only means of complete eradication, provided the houses and runs used by tuberculous birds can be positively cleaned and made free of any trace of the disease—this is a difficult matter. Houses can be allowed to stand unoccupied for at least one year (two will be better) while the runs are frequently cultivated and the soil of these runs subject to several applications of a disinfectant of a strength of at least a coefficient equaling ten of carbolic acid. Such a preparation is obtainable in the coal tar preparations especially ordered from the manufacturers or dealers.

How Many Hens to Keep

Growers who do not have enough good pullets to fill their houses to capacity this fall and winter may be justified in culling their hens less rigidly, according to a statement by Berley Winton of the Missouri College of Agriculture. This is especially true if there is an abundant supply of green feeds. A good yearling hen is superior to a poorly developed pullet but a well finished pullet usually lays more fall and winter eggs than a good yearling hen.

Poultrymen Keep Records

As in any business it is important to keep records and know what one is doing on the farm, but there is probably no phase of farming where this is more important than in the case with poultry, and it has been frequently observed that the best poultrymen are the best bookkeepers, advises an expert. Some of the world's foremost poultrymen have been auditors, men who would be miserable unless they knew exactly where they were financially.

Early Day Barbers

Barbers were first incorporated as a guild or profession in England by a statute of Edward IV, in 1461. In France barber-surgeons were incorporated as a distinct profession under Louis XIV, over 200 years ago. In 1745 an English statute separated barbers and surgeons into distinct corporations, but the striped barber's pole, the emblem of the barber-surgeon's profession, is still a cherished memorial of this ancient craft.

Stamp Act Congress

The Stamp Act Congress was a meeting of delegates from the colonies at the city hall in New York in October, 1765. Petitions were addressed to the king of England and to parliament protesting against the documentary tax laid on the colonies. A declaration of the rights of Americans was drawn up, stating, among other things, that internal taxes could not be laid on the colonies without their own consent.

Direction of Magnetic Field

The earth, as everyone knows, is a huge magnet whose field surrounds us. The direction of a magnetic field is the direction spontaneously taken by a magnetized needle freely suspended in it, and it is a known fact that the direction of such a field is distorted in the immediate neighborhood of a magnetic material such as iron.

Advertising What You Have To Sell

A YOUNG man living in one of the smaller cities recently decided to insert an advertisement in the daily newspaper in an effort to obtain a position. Some of his friends told him he was crazy. Jobs were scarce as hen's teeth. Employers weren't going to bother to write or telephone prospective employees, even if they had a job open.

Within a week the young man had his job, and some of those who had prophesied failure most loudly were wondering why they hadn't thought of the same thing. It's doubtful, though, if they realized the real secret of his success, for he had used his ad to sell himself and his services just exactly as a manufacturer of grocery products or automobiles uses advertising to sell his products.

Before the young man wrote his ad he sat down and studied his product—which in this case was himself—and what he could do. Instead of thinking of what a job would mean to him he thought of what he might mean to the man who employed him. Then he used his ad to tell the prospective employer what he had to offer as an employee, and why he would be an asset to the business.

In looking for a job no advice is more important than to put yourself in the place of an employer. His first thought is, "What can you do? What have you got to sell me for the price I can pay you?" Answer those questions in a fashion which will convince the employer that he is getting a bargain and there is every chance that the job will be yours.

Merchants who advertise know best how to please you.

'Bird Cage' Pot Holders Make a Practical Gift

By GRANDMOTHER CLARK

This cute pot holder set makes an attractive addition to any kitchen or an inexpensive practical gift. With very little handwork you can make this charming set. Good-looking pot holders are always in demand. Make up one of these sets and you will want to make more.

Package A-8 contains bird cage and two pot holders stamped and tinted on unbleached muslin to be embroidered and made up. Instructions are given for embroidery stitches and the color scheme is also given. Embroidery thread is not included. Fifteen cents each or four for 50 cents, postpaid.

Address Home Craft Co., Dept. A.

Perhaps the surest way to prevent a cold from 'catching hold' and getting worse is, at once, to 'Cleanse Internally'. Do it the pleasant tea-cup way. Flush the system with a hot cup of Garfield Tea—the mild, easy-to-take Brooklyn, N. Y. liquid laxative. At drug-stores.

GARFIELD TEA

Nineteenth and St. Louis Ave., St. Louis, Mo. Inclose self-addressed stamped envelope when writing for any information.

Character, Ability Need for Rhodes Scholarship

The founder of the Rhodes scholarship was Cecil John Rhodes, an Englishman, who left most of his wealth to provide scholarships at Oxford university for both Americans and Britons. These scholarships are for a period of three years each and are granted to persons between the ages of nineteen and twenty-five. Chief qualifications are scholastic ability and character.

Students are selected by committees of ex-Rhodes scholars, who judge the candidates by record and interview. Each year there are 34 students selected from Britain and her provinces and 32 from the United States and her possessions.

Ringworm on Head. Child Cried All the Time

Cuticura Relieved

"Ringworm started with a white crust on my little boy's head. Then it turned into eruptions and his head was in a terrible way. These eruptions itched and when he scratched them they would burn, and more broke out. He could not rest, but cried all the time."

"I tried different remedies, but the eruption lasted one year. Then I used Cuticura Soap and Ointment, and now my boy's head is relieved. I will never be without Cuticura Soap and Ointment." (Signed) Mrs. Margaret Carter, 840 Greenmount Ave., Baltimore, Md., May 27, 1935. Soap 25c, Ointment 25c and 50c, Talcum 25c. Sold everywhere. One sample each free. Address: "Cuticura Laboratories, Dept. R, Malden, Mass."—Adv.

INFLUENCE IMMORTAL

The men who are gone seem to have left behind them in the world much of their power of vitality; and I suppose hardly a day passes in which we do not do some act small or great, under this power of inspiration of our predecessors, something we should not have done, or should have done differently, if, even with all the machinery of living and all the truths we know now, we had had no predecessors, had been the first tenants if our earth.—Phillips Brooks.

Quick, Complete Pleasant ELIMINATION

Let's be frank. There's only one way for your body to rid itself of the waste matters that cause acidity, gas, headaches, bloated feelings and a dozen other discomforts—your intestines must function.

To make them move quickly, pleasantly, completely, without griping. Thousands of physicians recommend Milnesia Wafers. (Dentists recommend Milnesia wafers as an efficient remedy for mouth acidity).

These mint flavored candy-like wafers are pure milk of magnesia. Each wafer is approximately equal to a full adult dose of liquid milk of magnesia. Chewed thoroughly in accordance with the directions on the bottle or tin, then swallowed, they correct acidity, bad breath, flatulence, at their source and at the same time enable quick, complete, pleasant elimination.

Milnesia Wafers come in bottles of 20 and 48 wafers, at 35c and 60c respectively, or in convenient tins containing 12 at 20c. Each wafer is approximately an adult dose of milk of magnesia. All good drug stores carry them. Start using these delicious, effective wafers today.

Professional samples sent free to registered physicians or dentists if request is made on professional letter head.

How Firestone TIRES CUT OPERATING COSTS

WIDER, FLATTER TREAD WITH MORE RUBBER ON THE ROAD Gives Greater Mileage

TWO EXTRA LAYERS OF Gum-Dipped CORDS UNDER THE TREAD Locks it to Body

Gum-Dipped CORD BODY Prevents Internal Friction and Heat

CERTAIN construction features must be built into tires to give you the greatest safety and lowest operating cost in your type of service.

To make Firestone Tires blowout-proof, the cord body is built up of Gum-Dipped cords. To give you greatest non-skid safety and long mileage, the Firestone tread is scientifically designed, with a flatter contour and more rubber on the road. There are two extra layers of Gum-Dipped cords, to lock the rugged tread securely to the Gum-Dipped cord body.

Firestone Truck Tires are the only tires made that give you all these exclusive advantages.

Equip your trucks with Firestone Tires and start cutting your operating cost today. The nearby Firestone Auto Supply and Service Store or Firestone Tire Dealer is ready to serve you.

Listen to the Voice of Firestone—featuring Richard Crook, Nelson Eddy—with Margaret Speaks, Monday evenings over Nationwide N. B. C.—WEAF Network

These Men May Make Starhemberg a King

HERE in Vienna are members of the Heimwehr, the private army of Prince Ernst von Starhemberg, vice chancellor of Austria, which is planning to elevate him to the rank of regent of the country and later to proclaim him king. They believe the establishment of a Starhemberg royal dynasty preferable to the restoration of the Hapsburgs in the person of Archduke Otto, as the latter action would be strongly opposed by the little entente and some of the great powers.

BEDTIME STORY FOR CHILDREN

By THORNTON W. BURGESS

SAMMY JAY ARRIVES

WHEN Reddy Fox arrived at the pond of Paddy, the Beaver, the hunter who was hiding there saw him instantly. So did Lightfoot, the Deer. But no one else did. He approached in that cautious, careful way that he always uses when he is hunting. The instant he reached a place where he could see all over Paddy's pond he stopped suddenly as if he had been turned to stone. He stopped with one foot lifted in the act of taking a step. He had seen Mr. and Mrs. Quack.

Now you know there is nothing Reddy Fox likes better for a dinner than a duck. The instant he saw Mr. and Mrs. Quack, a gleam of longing crept

Mr. and Mrs. Quack Were Getting Very Near to Where Reddy Was Waiting for Them.

Into his eyes and his mouth began to water. Reddy stood motionless until both Mr. and Mrs. Quack had their heads under water as they searched for food in the mud in the bottom of the pond. Then, like a red flash, he bounded out of sight behind the dam of Paddy, the Beaver. Presently the hunter saw Reddy's black nose at the end of the dam as Reddy peeped around it to watch Mr. and Mrs. Quack. The latter were slowly moving along in that direction as they fed. Reddy was quick to see this. If he remained right where he was and Mr. and Mrs. Quack kept on feeding in that direction, the chances were that he would have a dinner of

fat duck. All he need do was to be patient and wait. So, with his eyes fixed fast on Mr. and Mrs. Quack, Reddy Fox crouched behind Paddy's dam and waited.

Watching Reddy and the ducks, the hunter almost forgot Lightfoot, the Deer. Mr. and Mrs. Quack were getting very near to where Reddy was waiting for them. The hunter was tempted to get up and frighten those Ducks. He didn't want Reddy Fox to have them because he hoped some day to get them himself.

"I suppose," thought he, "I was foolish not to shoot them when I had the chance. They are too far away now and it looks very much as if that red rascal will get one of them. I believe I'll spoil that red scamp's plans by frightening them away. I don't believe that deer will be back here today, anyway, so I may as well save those ducks."

But the hunter did nothing of the kind. You see, just as he was getting ready to step out from his hiding place, Sammy Jay arrived. He perched in a tree close to the end of Paddy's dam, and at once he spied Reddy Fox. It didn't take him a second to discover what Reddy was hiding there for. "Thief! Thief! Thief!" screamed

GIRLIGAGS

"A good season at the seashore," says ironic Irene, "and you begin to wonder which rises the oftener, the tide or the prices."

Sammy, and then peered down at Reddy with a mischievous look in his sharp eyes. There is nothing Sammy Jay delights in more than in upsetting the plans of Reddy Fox. At the sound of Sammy's voice, Mr. and Mrs. Quack swam hurriedly towards the middle of the pond. They knew exactly what that warning meant. Reddy Fox looked up at Sammy Jay and snarled angrily. Then, knowing it was useless to hide longer, he bounded away through the Green Forest to hunt elsewhere.

QUESTION BOX

by ED WYNN, The Perfect Fool

Dear Mr. Wynn:

I am a girl sixteen years of age. I have just left school to help earn money for my family. I would like to be an elevator operator. Can you please tell me the qualifications necessary to apply for a position to run an elevator?

Sincerely,

UPSON DOWNS.

Answer: To run an elevator you must be a good "story teller."

Dear Mr. Wynn:

I met a man yesterday with two little boys. He said: "These boys are sisters." How could they be?

Sincerely,

CARRIE MEBACK.

Answer: He was right. He meant they were his sister's children.

Dear Mr. Wynn:

What does a "Union" mean when its men go on strike for more money and shorter hours?

Yours truly,

DELLA GATE.

Answer: That means the men want more money and more time to spend it in.

Dear Mr. Wynn:

When a business concern has a "failure" there are generally two kinds of creditors. Just a plain creditor and a preferred creditor. Can you tell me the difference?

Sincerely,

I. M. STUCK.

Answer: A preferred creditor knows immediately that he gets nothing, while a plain creditor has to wait 60 to 90 days to find it out.

Dear Mr. Wynn:

There is a chap in my class at college about twenty-two years of age and he has the most peculiar habit I have ever seen. Whenever I look

at him he always has something on his nose, for instance, one minute he is juggling a feather on his nose, the next time I look at him he has a book on his nose, at another time he'll be strumming a tune on the bridge of his nose with the tips of his fingers. Can you tell me what in the world his idea is?

AL LOOMUS.

Answer: He must be one of those fellows who likes to have fun "on his own hook."

Chameleon Has Telescope Tongue
The Indian chameleon has a telescope tongue with which it can catch insects six inches distant.

She Shatters All Butter Records

CARNATION ORMSBY NELLIE, seven-year-old Holstein cow of the Carnation Milk farm at Carnation, Wash., has just broken the all-time record for the United States in butter producing, her mark being 1,861 pounds for one year.

HE COMES TO CHURCH

By DOUGLAS MALLOCH

AT LAST he came to church today: Six neighbors carried him that way;

But, when he passed the portals straight,
Another had to swing the gate,
Another open wide the door,
For he could open it no more.
But now at last he came in search
Of something that they have in church.

The preacher spoke a helpful word,
And yet I wonder if he heard,
Or, if he heard, he understood?
His hearing now was not so good.
He was made welcome, for all men
Are always welcome, even then;
And yet he would have been, I know,
As welcome years and years ago.

We all must go to church some day.
But some of us too long delay.
The words of comfort by our hier
We could have come in life to hear.
For here to greet us waits a Friend
At the beginning, not the end.
Religion is for living—aye,
To live by, not alone to die.

© Douglas Malloch—WNU Service.

Mother's Cook Book

DISHES THAT ARE DIFFERENT

A CREAM puff pastry is very simple to make, but the baking is the test of its perfection.

Bagdad Cream Puffs.

Heat together one cupful of boiling water and one-third cupful of corn oil. When boiling add altogether three-fourths of a cupful of flour mixed with one and one-half tablespoonsful of cornstarch and one-half teaspoonful of salt, all well sifted together. Stir and mix vigorously until the mixture leaves the sides of the pan. Cool and add one at a time three eggs, beating well after the addition of each; now add one teaspoonful of baking powder and beat well and drop by spoonfuls on a baking sheet, shaping into circular form. Bake from 35 to 45 minutes, depending upon the size of the puff. Cool with a sharp knife near the bottom of the puff, remove any doughy center and fill with the following:

Cut one-half a package of dates and one cupful of marshmallows with the scissors. Dip the scissors into water to keep the mallow from sticking. Chop one-half cupful of nuts, add one cupful of cream beaten until stiff, add a pinch of salt and a flavoring of vanilla. This amount will make one dozen large puffs.

Irish Kisses.

To one-half cupful of peanut butter add one-half cupful of dates, three-fourths of a cupful of powdered sugar and two unbeaten egg whites. Mix and beat until they are thoroughly blended. Drop by teaspoonfuls on buttered baking sheet and bake 15 minutes. This makes 18 kisses.

Nippy Puck Hat

This "puck" hat, inspired by "Mid-Summer Night's Dream," is made of green felt and trimmed with a pheasant's feather. The hand-knit scarf and the English suede gloves match the hat. The crocodile bag is russet brown.

"QUOTES"

COMMENTS ON CURRENT TOPICS BY NATIONAL CHARACTERS

Opinions expressed in the paragraphs below are not necessarily concurred in by the editor of this newspaper.

OUR FOREIGN POLICY

By CORDELL HULL

Secretary of State.

OUR policy as a member of the community of nations should be twofold—first, to avoid being brought into a war and, second, to promote as far as possible the interests of international peace and good-will.

A virile policy tempered with prudent caution is necessary if we are to retain the respect of other nations and at the same time hold our position of influence for peace and international stability in the family of nations.

In summary, while our primary aim should be to avoid involvement in other people's difficulties and hence to lessen our chances of being drawn into a war, we should, on appropriate occasions and within reasonable bounds, use our influence toward the prevention of war and the miseries that attend and follow in its wake. For, after all, if peace obtains, problems regarding neutrality will not arise.

OLD GUARD ASSAILED

By WILLIAM E. DUBOIS

Senator From Idaho.

I FEEL that the Constitution affords ample power to deal with our economic problems. I should be greatly surprised to find that the vast majority of the people do not feel the same way. But those who once were in a position to exercise these powers refused to act. Why then should we expect them to act if they should be given power again?

They permitted monopolies to get control of practically our entire material wealth and to fix the prices which the people should pay. When the export debenture was offered by some of us, which in my opinion would have gone far toward avoiding the crisis in agriculture, they rejected it. The only thing proposed was to slow up every third row of cotton and thus start a program of destruction in the face of want.

As to bureaus and expenditures, they created bureaus without precedent. Heaven knows the Old Guard has little to offer in the way of a program except repentance, and no one would accept their professions.

ISSUES DRAWN

By HAROLD G. HOFFMAN

Governor of New Jersey.

THE lines of our present conflict are clearly drawn. Upon the side where we stand are the forces of individual liberty and opportunity and of that greatest of human rights, the right to earn, to own and to enjoy the use of property.

Also in our ranks are those who believe that a people burdened with debt cannot by edict constitute themselves a rich government, although a spendthrift government can make a people poor.

Upon the side of our opposition stand those who deny history, who deny fact, who deny and strive to conceal their own blunders. In the same ranks stand those who draw their inspiration and ideas of government from sources both alien and repugnant to every meaning of the word "American."

People Heavier, Taller

People of today are taller and heavier than their ancestors, writes F. W. Christmas, Boston, Mass., in *Collier's Weekly*. The best evidence of this fact is the costumes which adorn the numerous wax effigies in the historical museum. These clothes were actually worn by persons who lived from 50 to 500 years ago, and they are much too small for the average-sized citizen of the Twentieth century.

Air Service to China Will Force New Travel Concept

You can now buy an air ticket to carry you to the Orient. It will put you on board the "China Clipper" in San Francisco bay late in the afternoon. You will be settled in a comfortable compartment in time for dinner—dinner beneath a star-studded sky far above the highest clouds of the eastern Pacific. You will roll out of a larger-than pullman berth to thrill at the early morning sun splashing gold over Honolulu harbor.

Then on again, by daylight now, over a necklace of surf-ringed coral keys to the little Midway Islands, where a well-appointed inn awaits your overnight stop. A short flight next day to Wake Island, a tiny dot in the vast Pacific. There, too, you pass a night. Another daylight flight. A night on Guam. The next night finds you in exotic yet modern Manila. Then the following morning you step ashore for luncheon, in China itself.—W. L. Van Dusen and Daniel Sayre in *Cosmopolitan*.

Dam Faced With Marble

An attraction, for visitors at Athens is a dam, recently constructed to supply the city with water, faced with marble. The stone is taken from a quarry which once supplied ancient Greek sculptors.

Find Out

From Your Doctor if the "Pain" Remedy You Take Is Safe.

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with Genuine Bayer Aspirin.

We say this because, before the discovery of Bayer Aspirin, most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of Bayer Aspirin largely changed medical practice.

Countless thousands of people who have taken Bayer Aspirin year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: Genuine Bayer Aspirin is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly.

You can get real Bayer Aspirin at any drug store—simply by never asking for it by the name "aspirin" alone, but always saying BAYER ASPIRIN when you buy.

Bayer Aspirin

Mr. and Mrs. Oscar Day and baby visited Mrs. Day's grandmother, Mrs. Martha McDaniel, of Wheelertown, last week.

Mr. and Mrs. Newt Perry of this place visited their son and daughter-in-law, Mr. and Mrs. James Perry, at Louisville, last week.

Mr. and Mrs. Leonard Hollbrook and children, of Cow Branch, were Saturday night guests of his parents, Mr. and Mrs. P. G. Hollbrook.

Born, Nov. 13, to Mr. and Mrs. Bill Elliott, a girl—Josie Lena.

Cecil Adkins and Miss Lydia Gilliam of Straight Creek were united in marriage Nov. 9, Rev. Peter Keaton tied the knot. The groom is the son of Mr. and Mrs. S. J. Adkins and the bride is the daughter of Mrs. J. P. Gilliam. The writer wishes them a happy life.

FLAT WOODS

Nov. 25.—J. B. May left the first of the week with a load of turkeys.

Ambrose Payton was the guest of W. P. Henry and family Friday night. Byron May was the guest of his sister, Mrs. Wilma Wells, Sunday.

Hobart Halsey called on friends at Woodshend on Thursday.

Uncle Jeff Frisby killed a fine hog Saturday.

Mr. and Mrs. T. H. Henry and daughter Monelle were guests of Mr. and Mrs. Ollie Engle, of Licking River, last Sunday.

W. M. Henry and daughter Elizabeth, of Frenchburg, were the Sunday guests of Mr. and Mrs. W. P. Henry.

Sunday school is progressing fine with large attendance. Everybody is invited to attend.

D. O. Carpenter and N. G. Ratliff attended court at West Liberty last week.

There will be church at Flat Woods on Saturday night and Sunday, Dec. 14 and 15, conducted by Rev. Everett Todd and Rev. Hobart Halsey.

OAK HILL

Nov. 17.—Mrs. T. E. Cassidy, who has been on the sick list for some time is slowly improving.

Misses Delpha Wilder, Lizzie Blair and Emmell Easterling were guests Sunday of Miss Alva Collins.

Miss Olive Sergeant, who is employed in the home of Mrs. E. P. Lewis, Wrigley, visited her parents, Mr. and Mrs. Burt Sergeant, over the week end and attended church at Blakes Mill.

The Oak Hill school went to Wrigley on Friday afternoon to play ball. A real ball game was enjoyed. Scores were 11 and 5 in favor of Oak Hill.

Mr. and Mrs. Homer Easterling have moved into the house vacated by Mr. and Mrs. Avery Abrams and family, who have gone to Middletown, O.; and Mr. and Mrs. Willis Callahan and family, of Leisure, have moved into the house vacated by Mr. Easterling.

R. F. Davis, our teacher, visited home folks at Ezel over the week end. Wade Roberts and a friend from the CCC camps in Indiana visited his parents, Mr. and Mrs. Clark Roberts, over the week end.

Miss Ola Collins is spending the week end at Wrigley with Mr. and Mrs. Burt Ratliff.

Good luck to the Courier crew. RED

The Hare Indians

The Hare Indians are a tribe of Athabaskan stock, living in the extreme northwest of Canada. They rely greatly upon the Arctic hare for food and clothing, hence their name, but also fish, and hunt the caribou.

Distress Signal at Sea

at One Time Was C. Q. D.

The first use of the wireless at sea on a sinking ship to save life was made by Jack Binns, wireless operator on the Republic, which was rammed by the Florida on January 23, 1909, in the north Atlantic, off Nantucket. The distress signal at that time was not S. O. S., but C. Q. D. (Come quick danger).

The code S. O. S. was adopted by the international radio conference in June, 1912, because of its simplicity. The distress signals sent out by Binns were received by the Baltic, which raced to the rescue, removing passengers from the overloaded Florida. No life was lost in the transfer of passengers and crew from the Republic to the Florida and from the Florida to the Baltic.

According to "Famous First Facts," the first radio S. O. S. was transmitted by the Arapahoe on August 11, 1909, when disabled off Cape Hatteras, both this and the C. Q. D. signal being sent out.

Birth of B. & O. Railroad

As the Erie canal threatened the western trade of Baltimore, a group of business men of that community commenced plans for the building of a railroad across the mountains of the Ohio river. Thus was the Baltimore & Ohio railroad born. For the impressive ceremonies held at Baltimore July 4, 1828, the immortal Charles Carroll was called upon to make the speech and place the foundation stone of the B. & O., the first of the steel lines connecting the West and the East. At the age of ninety-three, Carroll was a man who belonged to the past, but that he could look into the future is seen in his statement: "I consider this among the greatest acts of my life, second only to that of signing the Declaration of Independence."—Cleveland Plain Dealer.

FLORENCE MCGUIRE, Executrix, estate of W. W. McGuire.

Origin of Chess

The origin of chess is lost in obscurity, says a writer in the Philadelphia Inquirer. Its invention has been variously ascribed to the Greeks, Romans, Babylonians, Scythians, Egyptians, Jews, Persians, Chinese, Hindus, Arabians, Arameans, Castilians, Irish and Welsh. Some have endeavored to fix upon some particular individual as the originator of the game; among others named are Japheth, Shen, King Solomon, Xerxes, Hermes, Aristotle, Semiramis, Zenobia, etc. However, the view which has obtained most credence is that which attributes the origin of chess to the Hindus.
